Now it's easy for you to have a better lawn

Save money

Why even consider a lawn care serv-
ice? Scotts Annual Program will give
you a beautiful lawn for less money.

Start anytime

You can start into the Annual Program
anytime of the year. Just check the
month and select the appropriate Step
listed below.

Simple and easy

No more guesswork. You simply apply
the right product - one Step at a
time.

Guaranteed results

Each Step is designed to the specific
season to help give you a healthier,
greener lawn.

(ILLUS.)

(The 4 Steps listed below will be placed horizontally in one row.)

step 1. Early Spring February-April

Crabgrass Preventer plus Fertilizer - prevents crabgrass, foxtail, spurge,
oxalis, chickweed and other annual weeds while providing deep, thick greening
for 2 months.

step 2. Late Spring April-June

Fertilizer Plus Weed Control - controls dandelions, clover, plantain
and other broadleaf weeds while greening your lawn for 2 more months.

step 3. Summer June-August

Insect Control plus Fertilizer - controls white grubs, chinch bugs, sod
webworms and other lawn insects plus keeps your lawn green through the Summer.

step 4. Fall August-November

Lawn Fertilizer - specially formulated for the Fall - the best time to develop
a stronger root system for a healthier, thicker lawn. Helps your lawn green
up even quicker next Spring.

step2 DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

LEFT COLUMN

Application

- . Apply to moist foliage when weeds are actively growing, but not before yellow dandelion blooms have appeared.
- . Be careful when applying this product near shrubs, flower beds or vegetable gardens as weed control may damage these desirable plants.
- . Do not apply on the rootzone areas of shrubs or under the branch spread of trees.
- . Don't use on creeping bentgrass lawns or on newly seeded and sodded lawns until after the fourth mowing. Don't plant grass for one month after using this product and don't apply when daytime temperatures are consistently 90 degrees or above.
- . Allow at least 4-6 weeks between program applications.

Watering or Rain

- . Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.
This product should not be applied if rain is expected within the next 24 hours.

RIGHT COLUMN

Tips on Spreading

Scotts Drop:

- . Do not apply during windy days.
- . First apply 2 header strips.
- . Overlap spreader application area to avoid strips of untreated lawn.
- . Shut off spreader when you reach the header strip or any time you stop.
