Now it's easy for you to have a better lawn

Save money

Why even consider a lawn care service? Scotts Annual Program will give you a beautiful lawn for about half the cost.

Start anytime

You can start the Annual Program anytime of the year. Just check the month and select the appropriate Step listed below.

Simple and easy

No more guesswork. You simply apply the right product - one Step at a time.

Guaranteed results

Each Step is designed for the specific season to help give you a healthier, greener lawn.

(ILLUS.)

(The 4 Steps listed below will be placed horizontally in one row.)

step™ 1. Early Spring February-April

Moss Control plus Fertilizer - controls unsightly moss while providing deep, thick greening for up to 2 months.

step™ 2. Late Spring April-June

Weed Control plus Fertilizer - controls broadleaf weeds while greening your lawn for up to 2 more months. This is Scotts best weed and feed.

step™ 3. Summer June-August

Insect Control plus Fertilizer - controls white grubs, chinch bugs, sod webworms and other lawn insects plus keeps your lawn green through the Summer.

step™ 4. Fall August-November

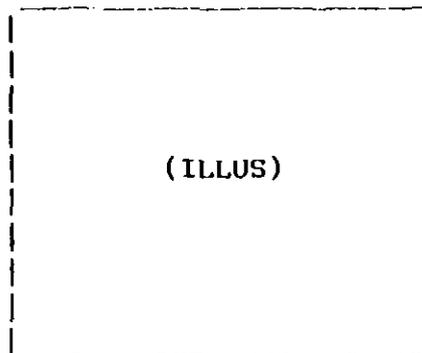

Lawn Fertilizer - specially formulated for the Fall - the best time to develop a stronger root system for a healthier, thicker lawn. Helps your lawn green up even quicker next Spring This is Scotts best fall fertilizer..

**CONTROLS  
MOSS**

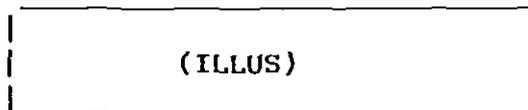

Each uniform granule in this bag contains the necessary active ingredient to control the moss in your lawn. Each moss plant in your lawn will get thoroughly coated to assure a complete effective control. The moss will turn black and eventually disappear.

Thick moss can overwhelm grass during winter and spring

The uniform granules in Scotts Moss Control provide an effective control.

Other moss control products with a mixture of large and small granules can give uneven control.

**step™ 1 DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Apply during winter through early spring ((December-April) or (February-April)) when moss is actively growing.

It is best to apply when the lawn is moist and tall grass has been mowed to expose low growing moss. Use the **REGULAR RATE** (covers 5,000 sq. ft.) for normal moss infestations. Use the **HEAVY RATE** (covers 4,000 sq. ft.) for heavy moss infestations.

Do not apply to a newly seeded or sodded lawn until it has been mowed four times.

Brush or rinse particles from cement, stone, clothing or shoes to prevent staining.

Grass blades may show a temporarily black color, however this condition will disappear after mowing.

TIPS ON SPREADING WITH SCOTTS SPREADERS

Scotts Drop:

- First apply 2 header strips
- Operate spreader the longest way of the lawn
- Overlap wheels to insure uniform feeding
- Shut off spreader when you have reached the header strips or stopped

EasyGreen™ Rotary:

- Slide shut-off lever to the right, application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs
