UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

WASHINGTON, D.C. 20460

JUN 5 2007

OFFICE OF
PREVENTION, PESTICIDES
AND TOXIC SUBSTANCES

Lisa R. McClellan
The Scotts Company
14111 Scottslawn Road
Marysville, OH 43041

Dear Ms. McClellan:

SUBJECT: Revised Basic Confidential Statement of Formula
And Revised Labeling (Conversion to MCPPP-p)
Private Label Feed and Weed
EPA Registration No. 538-236
Your Application Dated February 19, 2007

The Agency has completed its review of the revised basic Confidential Statement of Formula, dated February 12, 2007 and has determined that it is acceptable. The amended basic CSF will supersede the current basic CSF, dated June 24, 1988. A copy of the review is enclosed for your records. The label amendment referred to above, submitted in accordance with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in acceptable with the following provisions:

1. Under the "Environmental Hazards" section of the labeling revise the statements to read as follows:

"This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark except as noted on appropriate labels. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or rinsates.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern of well may result in contamination of drinking water or groundwater."

2/20

A stamped copy is enclosed for your records. Please submit one (1) copy of your final printed labeling before you release the product for shipment. This amended labeling supersedes all previously accepted ones.

Sincerely yours,

Joanne I. Miller

XX NITROGEN	X PHOSPHORUS	X POTASSIUM
Essential for plant growth; makes grass green.	Stimulates root growth; helps grass multiply.	Makes plant strong; better able to resist drought and extreme heat.

[APPLICATION]

How and When to Apply

Apply Anytime Weeds Are Growing

Apply in late spring, summer, or fall. For use on bahia, bermuda, bluegrass, centipede, fescue, ryegrass, or zoysia lawns.

DO NOT USE ON ST. AUGUSTINEGRASS, FLORATAM, DICHONDRA, LIPPIA, CARPETGRASS OR BENTGRASS LAWNS.

4/20

How Much is Enough?

To determine the square footage of your lawn, walk the length and width of your lawn; one average pace equals about 3 feet. Multiply the length of the lawn by the width of the lawn. This equals the area of your lawn in square feet. NOTE: If your lawn has an irregular shape, measure square areas, then add the figures together to reach your total lawn size.

Note to PM: Claims regarding Weed Control Properties

- Kills Weeds Completely!
- 2-Way Control
- Patented formula kills weeds that ordinary weed & feeds miss
- Kills dandelions and other major lawn weeds*
- Clears out dandelions and over/more than 50 (other) broadleaf weeds*

5/20

- Kills dandelions, clover and most other broadleaf lawn weeds*
- Weeds are killed completely -- roots and all.
- Use anytime you have weeds!* *See Directions for Use
- Small, lightweight granules provide complete uniform coverage and are quickly absorbed to help insure control of large and small weeds.
- Controls more than 50 common lawn weeds such as dandelion, clover and chickweed.
- Effective on both large and small weeds* (see list below).
- Kills roots and all.
- Kills dandelions, chickweed, white clover and most other common broadleaf weeds*.
- Kills most common lawn weeds*!
- Scotts Ultimate Weed Control!

Note to PM: Combination Claims

- Scotts' most effective weed and feed
- TWeed control plus lawn fertilizer for use on bahia, bermuda, bluegrass, centipede, fescue, ryegrass or zoysia lawns
- All you need for a thicker, greener lawn without dandelions
- Clears out clover and other broadleaf weeds and helps prepare your lawn for winter
- Kills dandelions and more than 50 other broadleaf weeds after they sprout and helps make your lawn its thickest, greenest ever
- Kills dandelions, clover, chickweed and other non-grassy weeds while greening your lawn without rapid, extreme growth
- Unlike ordinary weed-and-feeds, every particle of this product contains Scotts patented timed-release nitrogen plus phosphorus, potassium, and weed control. (See back for details).
- "We guarantee thick, green, weed-free turf without risk of surge growth."
- Thick, green, weed-free turf
- What to expect
 - Dandelions and other weeds will be killed in 3 to 4 weeks and your lawn will be greener in 4 to 6 days
- Thickens lawn to crowd out weeds
- XX% more greening power than Brand X (Private Label comparative product)

Note to PM: Claims regarding Fertilizer Properties:

- ULTRA GREENING POWER!
- Timed-release nitrogen won't burn your lawn or cause surge growth
- Plus fertilizes with a feeding of Private Label Feed & Weed for developing thick, green lawns
- Builds thick, green turf from the roots up [without burning your lawn]
- Scotts Best Annual Program For A Picture-Perfect Lawn Boost of nutrients to help your lawn survive/prepare for the summer/summer stress/heat, drought & wear and tear!
- Develops longer, deeper roots to help your lawn survive/prepare for the summer/summer stress/heat, drought, and wear and tear!
- Builds thick, green turf without burning
- Feeds lawn, helping turf to fill in where weeds once were
- Strengthens/protects your lawn
- Fast, long lasting greening power
- Won't burn lawns, guaranteed.
- No burning
- No surge growth
- Builds thick, green lawns.
- Quick greening, long lasting.

6/20

- Patented, timed-released nitrogen formula builds thick, green lawns from the roots up
- Each lawn fertilizer particle provides safe gradual release that won't burn or cause surge growth when applied as directed
- Delivers nutrients which enhance root growth and provide extended feeding
- All the nutrients your lawn needs in one application/bag/step
- Scotts All-in-One®** particles combine essential nutrients into every particle (for even feeding)
- Total nutrient package helps repair thin and bare spots in your lawn
- Patented timed-release nitrogen formula builds thick, green lawns from the roots up.
- Miracle-Gro® nutrients help develop a thicker, greener lawn
- Super Private Label lawn fertilizer contains extra nitrogen, carefully blended with potassium and phosphorus, to make your lawn greener
 - Your lawn will be greener in 4 to 6 days if weather conditions are good (warm soil, some moisture) and application instructions were followed.
 - The greening will reach its peak 8 to 10 days after application. The color difference will be more noticeable if your lawn is hungry to begin with.
 - Super Private Label works below the soil, too, helping to promote root and rhizome development; this strengthens the grass plants and enables them to produce more blades of grass, and it thickens the lawn with the addition of new grass plants.
 - Thin areas of turf will fill in over time (about 6 weeks), creating a more uniformly dense lawn.
- Patented timed-release Miracle® Capsules feed your lawn over an extended period of time.
- There's no overfeeding or underfeeding when you follow the fail-proof directions.
- The result is a beautiful, thicker, greener lawn.
- (Scotts®) Golf's Choice for Greener Turf
 - Golf course superintendents have relied on Scotts products to grow fine turf since the beginning of the century. In fact, Scotts products are used by 75 of the top 100 golf courses in the United States -- and now Ultra Private Label products allow you to use that same high-performance technology on your home lawn. Go for the green with Scotts!
- (Scotts®) Baseball's Choice for Greener Fields
 - If you've ever marveled at the beauty of the grass on baseball's finest fields and wondered how you could possibly grow that kind of turf at home, you hold the answer in your hands. Scotts, the official turf care company of Major League Baseball, now offers Ultra Private Label products for homeowners, with the fertilizer technology used by professional groundskeepers for big-league ballparks.

FOR BEST RESULTS, APPLY THE SCOTTS® PRIVATE LABEL® Annual Program

- No more guesswork . . . apply the right product at the right time for a thick, green, weed-free lawn
- Start anytime . . . just check the month below and apply products at 2 month intervals

Private Label® With Halts® Crabgrass Preventer	Private Label® With Plus 20® Weed Control
<ul style="list-style-type: none"> • Apply in early spring (Feb.-April) • Prevents crabgrass and other annual weeds while feeding your lawn. (In the Pacific Northwest, substitute Private Label® and Moss Control Granules. For St. Augustine grass, substitute Bonus® S. For dormant bermudagrass, substitute Halts®.) 	<ul style="list-style-type: none"> • Apply in late spring (April-June) • Kills dandelions and other broadleaf weeds while feeding your lawn. (For St. Augustinegrass substitute Private Label®.)
Private Label® With Insect Control	Private Label Winterguard®
<ul style="list-style-type: none"> • Apply in summer (June-Aug.) • Kills lawn damaging insects plus fleas while feeding your lawn. • For grub control, apply Scotts® GrubEx® anytime from April to mid-August. 	<ul style="list-style-type: none"> • Apply in fall (Aug.-Nov.) • Important time to feed for a thicker, greener lawn.

Optional Winterizer Feeding

Late Fall
 (Sept.-Nov.)
 (4 to 6 weeks after Early Fall Private Label feeding)
 Apply as last feeding in fall to help prepare your lawn for winter

9/20

Super Winterizer

Additional Super Winterizer Feeding

Late Fall

September – November

4 to 6 weeks after Early Fall fertilizer feeding. Apply as last feeding in fall to help prepare your lawn for winter.

Now it's easy for you to have a better lawn

Save money

Why even consider a lawn care service? Scotts Annual Program will give you a beautiful lawn for less money.

Or

Why even consider a lawn care service? Scotts Lawn Pro® Annual Program will give you a beautiful lawn for about one-third the cost.

Start anytime

You can start into the Annual Program anytime of the year. Just check the month and select the appropriate Step listed below.

Simple and easy

No more guesswork. You simply apply the right product - one Step at a time.

Guaranteed results

Each Step is designed to the specific season to help give you a healthier, greener lawn.

Step 1 - Early Spring February-April	Step 2 - Late Spring April-June	Step 3 - Summer June-August	Step 4 - Fall August-November
Crabgrass Preventer plus Fertilizer - prevents crabgrass, foxtail, spurge, oxalis, chickweed and other annual weeds while providing deep, thick greening for up to 2 months. This is Scotts best fertilizer plus crabgrass preventer. In the Pacific Northwest, Step™ 1 is "Moss Control plus Fertilizer".	Weed Control Plus Fertilizer - controls dandelions, clover, chickweed and other broadleaf weeds while greening your lawn for up to 2 more months. This is Scotts best weed and feed.	Insect Control plus Fertilizer - controls white grubs, chinch bugs, sod webworms and other lawn insects plus keeps your lawn green through the Summer.	Lawn Fertilizer - specially formulated for the Fall - the best time to develop a stronger root system for a more vigorous, thicker lawn. Helps your lawn green up even quicker next Spring. This is Scotts best fall fertilizer.

Scotts (Product Name) Works in Two Ways:

Granule Size

Scotts tiny, lightweight granules provide two advantages: 1) they stick to weed leaves far better than the larger, heavier pellets of other weed & feeds 2) they spread evenly for better weed control and feeding. The better the

product adheres to the weed leaves, the better the results!

10/20

The Scotts Advantage®:

Tiny, Lightweight Particles For Better Weed Control

Weed killers work by entering through the weeds' leaves. Therefore, its best to apply this product to a wet lawn, so the particles can stick better to the weeds. Private Label with (to be named) has tiny, lightweight granules that stick to weed leaves far better than the larger pellets of other weed killers, for better control of broadleaf weeds.

-OR-

The Scotts Advantage®:

Each of Scotts exclusive All-in-One Particles®* contains the guaranteed feeding nutrients and the weed control ingredients to provide consistent feeding and weed control to every treated square inch of your lawn. The result: A thick, green weed-free lawn without burning. **GUARANTEED.**

- All-in-One Particles® = nitrogen, phosphorus, potassium and the weed control ingredient contained in [on] every particle.

-OR-

- All-in-One Particles® = nitrogen, potassium and the weed control ingredient contained in [on] every particle.

Advantages of Private Label Feed and Weed SUPERIOR QUALITY

SMALL LIGHTWEIGHT GRANULES MEAN BETTER WEED CONTROL. Most lawn weed controls must be absorbed through the weed's leaves to be effective. Private Label Feed and Weed granules are small and lightweight so they will stay on even the smallest weed leaves. And each Private Label Feed and Weed granule contains weed control and America's favorite lawn fertilizer.

SCOTTS TRIONIZED® II FORMULA PROVIDES A MORE EFFICIENT NITROGEN THAN EVER BEFORE to help promote quicker greening.

THE NITROGEN IN PRIVATE LABEL® PLUS 2® WEED AND FEED IS TIME-RELEASED to provide a supply of this essential nutrient to help your lawn stay thick and green for up to 6 to 8 weeks.

EACH PRIVATE LABEL® PLUS 2® WEED AND FEED GRANULE CONTAINS NPK AND WEED CONTROL. We bond Scotts® unique controlled-release nitrogen (N) with phosphorous (P) and potassium (K) and a weed control, so your lawn receives a uniform feeding, and effective weed control.

[ILLUS.] Scotts Private Label Feed and Weed	[ILLUS.] Competitive Simple Mixture
<p align="center">EVERY GRANULE CONTAINS NPK AND WEED CONTROL</p> <p>Provides uniform greening with effective weed control.</p> <p>Private Label Feed & Weed particles deliver the same ratio of nitrogen, phosphorus, potassium and weed control to every square inch of turf for even, consistent feeding plus better weed control.</p>	<p align="center">EACH GRANULE IS A SEPARATE CHEMICAL.</p> <p>May cause uneven greening and spotty weed control</p> <p>Ordinary mixed weed & feeds: Granules contain different nutrients. Nutrients and weed control granules of different sizes and shapes can separate during application resulting in uneven, inconsistent, feeding and weeding.</p>

How Weed Control Works

Small, lightweight granules mean better weed control. Most lawn weed controls must be absorbed through the weed's leaves to be effective. The weed control in this product consists of granules that are small and lightweight, so they will stay on even the smallest weed leaves. The weed control in Private Label Feed & Weed is absorbed by weed leaves (the weed's leaves), killing the plant completely, root and all.

Other Great Private Label® Products for Your Lawn

To prevent crabgrass, use **Private Label® Plus Halts®**. No one else has a tougher crabgrass preventer. This problem solver forms a protective barrier to stop ugly crabgrass before it starts.

If you don't have weed problems, use **Private Label®** America's favorite lawn fertilizer. Private Label® promotes quick, deep greening without the danger of burning.

These great **Private Label®** products are developed specially by Scotts for the unique needs of your lawn - your satisfaction is unconditionally Guaranteed.

Key Product Facts

Directions for Use [Option 1]

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year.

General Precautions/Restrictions

- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. (People and pets may reenter lawn after dusts have settled.)
- Do not use this product on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, St. Augustine, dichondra, floritam, carpetgrass or lippia lawns.

Application

- Apply when weeds are actively growing (when daytime temperatures are consistently between 60°F and 90°F.).
- Grass wet with dew or thoroughly-watered grass helps particles stick to weed leaves.
- **In Spring** treat bahia and centipede lawns mid-March or later after the second mowing. **In Fall**, treat centipede lawns before October 1 and bahia lawns before November 1.

Watering or Rain

This product may be applied if rain is not expected in the next 24 hours.

Water your lawn no sooner than 24 hours after application. If watering sooner, water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.

IMPORTANT

What to Expect

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for complete control. This product will not prevent weed seeds from producing new plants.

Under certain conditions, temporary discoloration may occur on bahia, centipede, bermudagrass, and zoysiagrass lawns.

Seeding/Sodding/Sprigging

Wait at least one month after you have applied this product before seeding, sodding or sprigging.

Mow new grass at least 4 times before applying.

[Note to PM: End of Option 1]

13/20

Directions for Use [Option 2]

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year.

Application

- Apply to moist foliage after yellow dandelion blooms have appeared.
- Daytime temperatures should be consistently between 60°F and 90°F.
- To keep from reaching storm sewers, sweep or blow any stray particles from hard surfaces back onto lawn area. Do not clean spreader over hard surfaces or near storm drains.
- Allow 4-6 weeks between program applications.

Watering or Rain

- Water your lawn no sooner than 24 hours after application. Water will wash the weed control off the weed's leaves and reduce effectiveness of this product.
- This product should not be applied if rain is expected within the next 24 hours.

General Precautions/Restrictions

- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. (People and pets may reenter lawn after dusts have settled.)
- Apply carefully when near shrubs, flower beds or vegetable gardens, as weed control may damage these desirable plants.
- Do not over apply, especially under the drip zone of desirable shrubs and trees as some of the control ingredients are root absorbed.
- Wait until after the 4th mowing to use on newly seeded or sodded lawns
- Plant grass no earlier than one month after using this product.
- Do not use on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass lawns.

[Note to PM: End of Option 2]

Directions for Use [Option 3]

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

- This product applies 1.5 pounds of 2,4-D per acre per application.
- Do not apply more than twice per year.

Application

- Apply on a calm day.
- Make sure that the grass is wet from dew or sprinkling before applying. (This helps particles adhere to weed leaves to produce best results.)
- Set spreader to the setting indicated by the chart below before applying.

14/20

What to Avoid

- Do not water or mow lawn for at least 24 hours after application. (Granules must remain on weed leaves for 24 hours to be effective.)
- Do not apply if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60° F or above 90° F.
- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. (People and pets may reenter lawn after dusts have settled.)
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Grass should not touch the bottom of a drop spreader. Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed four times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.
- Do not apply on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass.
- On bahia or centipedegrass lawns, wait until after the second mowing of the year, but not before mid-March.
- In fall, DO NOT treat centipedegrass after Oct. 1, nor bahiagrass after Nov. 1.

[Note to PM: End of Option 3]

Directions for Use [Option 4]

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

- This product applies 1.5 pounds of 2,4-D per acre per application.
- Apply no more than twice per year.

Application

- Make sure that the grass is wet from dew or watering before applying. (This helps particles adhere to weed leaves to produce best results.)
- Set spreader to the setting indicated by the chart below before applying. Fill spreader over bare ground or hard surface.
- Apply one or two header strips, then apply in longest direction of lawn. Shut off spreader each time you reach the header strip, or stop.
- Sweep or blow stray particles from hard surfaces back onto lawn area. Clean spreader away from hard surfaces or storm drains.
- One month after using this product, it is okay to seed, sod or plant grass sprigs.
- Mow grass 4x before applying on newly seeded, sodded or sprigged areas.

15/20

What to Avoid

- Applying this product if rain is expected within 24 hours.
- Day temperatures that are regularly below 60° F or above 90° F.
- Mowing or watering lawn for at least 24 hours after application. (Granules must remain on weed leaves for 24 hours to be effective.)
- Allowing product to contact people or pets directly or through drift. Keep people and pets off lawn during application. (People and pets may reenter lawn after dusts have settled.)
- Allowing granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Applying this product on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass.
- Applying before the second mowing of the year and before mid-March on bahia or centipedegrass lawns.
- Treating centipedegrass after Oct. 1 and bahiagrass after Nov. 1.
- Applying to hard surfaces like driveways or streets.

[Note to PM: End of Option 4]

Spreader Settings

[Option 1]

Tips on Spreading

Scotts Drop:

- Do not apply during windy days.
- First apply 2 header strips.
- Overlap spreader application area to avoid strips of untreated lawn.
- Shut off spreader when you reach the header strip or any time you stop.

EasyGreen® Rotary:

- Slide shut-off lever to the right, application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs

If you have questions

We designed this program to make having a better lawn as simple and easy as possible. But you may still have some questions about your lawn during the year. If so, you can contact the Scotts Lawn Pro retailer where you bought this program. They are ready to answer your questions and provide any help or information that you may need - **OR**-You can get the answer by talking directly with one of Scotts lawn counselors. Simply dial this toll-free number 1-800-543-TURF (in Ohio 1-800-762-4010).

17/20

**[Option 2]
Spreading Tips**

For best results, use a Scotts spreader

	Spreader Setting REGULAR RATE covers 5,000 sq.ft.	DIRECTIONS
Scotts Drop Spreaders	X	Mow lawn first; apply 2 longest direction of lawn, overlapping wheel marks.
Scotts EasyGreen® Rotary	X	Make each pass about XX header strips; apply inches from previous pass to overlap spread width.
Scotts SpeedyGreen® Rotary	X	Make each pass about X feet from previous pass to overlap spread width.

SETTINGS FOR DROP SPREADERS	
	NORMAL
Scotts - all models	XXX
Republic EZ Drop	XXX
Ortho	XXX
Sears, K Gro	XXX
Red Devil	XXX

SETTINGS FOR ROTARY SPREADERS	
	NORMAL
Scotts EasyGreen® (30" spread width)	XXX
Scotts SpeedyGreen® (5' spread width)	XXX
Republic EZ Rotary	XXX
Ortho, Sears, K Gro	XXX
Red Devil	XXX

When Using A Drop Spreader: Mow lawn first if grass is tall enough to touch the bottom of the spreader. First apply two header strips. Then operate spreader the longest way of the lawn. Overlap wheel marks to insure uniform feeding. Shut off spreader when you have reached the header strips or when you have stopped.

When Using A Rotary Spreader: Shut-off spreader any time you stop. For complete coverage make each pass according to spreader manufacturer's directions so some overlapping occurs.

18/20

**[Option 3]
Spreader Settings
Spreading Tips**

Apply header strips. Then apply product in longest direction of lawn. For best results, use a Scotts® spreader.
