Super Turf Builder

WITH

PLUS 2 Weed Control

LAWN FERTILIZER AND BROADLEAF WEED CONTROL

- More greening power than Turf Builder With Plus 2 Weed Control
- Builds thick, green turf from the roots up without burning your lawn
- Kills dandelions and other major lawn weeds
- Patented formula kills weeds that ordinary weed & feeds miss
- For best results, apply a Scotts annual program (see back panel for details)

Now it's easy for you to have a better lawn

Start anytime
You can begin the Annual Program anytime of the year. Just check the month and select the appropriate Step listed. Apply the remaining Steps at two-month intervals.

Simple and easy
No more guesswork. You simply apply the right product, one Step at a time.

Early Spring

February - April
GrassPro Feeder plus Fertilizer prevents crabgrass, foxtail, spurge, stable, chickweed and other annual weeds while providing dry, slack greening for up to 2 months. In the Pacific Northwest, STEP™ 1 is "Fast Action With New Control" for St. Augustinegrass. STEP™ 1 is "Super Turf Builder".

Late Spring

April - June
Weed Control plus Fertilizer controls dandelion, clover, chickweed and other broadleaf weeds while greening your lawn for up to 2 more months. For St. Augustinegrass, STEP™ 2 is "Super Turf Builder".

Summer

June - August
Weed Control plus Fertilizer controls chickweed, clover, and whitegrass (from mow) and other lawn weeds plus green your lawn through the summer. For grub control, apply "Grubs Control" anytime from April to mid-August.

Fall

August - November
Lawn Fertilizer - specially formulated for the fall - the best time to develop a stronger root system for a more vigorous, thicker lawn. Helps your lawn green up over a quicker and longer.

Additional Super Winterizer™ Feeding

Late Fall
September - November
4 to 6 weeks after Early Fall fertilizer feeding. Apply at last feeding to help prepare your lawn for winter.

Guaranteed results
Each Step is designed to the specific season to help give you a greener lawn.

Save money
Why even consider a lawn care service? Scott's Lawn Pro Annual Program will give you a beautiful lawn for about one-third the cost.

How and when to apply

- Apply in late spring, summer, or fall
- Directions for use: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Apply any time weeds are actively growing (when daytime temperatures are consistently above 60°F).
- Avoid applying when temperatures are consistently above 90°F.
- Apply on a calm day.
- Apply to moist grass. To help particles stick to weed leaves, the grass should be thoroughly watered or wet from dew before applying Super Turf Builder With Plus 2 Weed Control.
- On bahia and centipede grass lawns, wait until after the second mowing of the year, but NOT before mid-March. In the fall, DO NOT treat centipede after the first of October and DO NOT treat bahia after the first of November.
- Do not use this product on flowers, shrubs, fruit, or vegetable plants or on creeping bentgrass, St. Augustinegrass, carpetgrass, dichondra, or lippia lawns. On bermudagrass, bahia, centipede, or zoysiagrass lawns, under certain conditions, some temporary discoloration may result.
- This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year.
- Watering or rain: Do not water your lawn for 24 hours after application. Water will wash the weed control off the weeds' leaves and reduce the effectiveness of this product. This product should not be applied if rain is expected within the next 24 hours.

IMPORTANT

What to expect
Weed stems and leaves will begin to wilt and curl in a few days, but a month or more may be required for complete control. This product will not prevent weed seeds from producing new plants. Seeding/soil seeding: Wait until the new grass has been sowed at least four times before applying Super Turf Builder With Plus 2 Weed Control. If you are planning to seed, sod, or sprig, you should wait at least one month after you have applied Super Turf Builder With Plus 2 Weed Control. STORAGE: Store in a clean, dry place. Reveal opened bag by folding top down and securing. PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash. CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

The Scott's Difference.

Unlike ordinary weed & feeds, every particle of Super Turf Builder With Plus 2 Weed Control contains Scott's patented timed-release nitrogen, plus phosphorus, potassium and weed control.

Super Turf Builder With Plus 2 Weed Control particles deliver the same ratio of nitrogen, phosphorus, potassium and weed control to every square inch of turf for even, consistent feeding plus better weed control.

Ordinary Mixed Weed & Feeds Granules contain different nutrients. Nutrient and weed control granules of different sizes and shapes can separate during application resulting in uneven, inconsistent feeding and weeding.

Spreading tips

For best results, use a Scott's spreader. Apply header strips. Then apply product in longest direction of lawn. Be careful when applying this product near shrubs, flower beds, or vegetable gardens as contact with weed control may damage these desirable plants. When using EasyGreen® or SpeedyGreen® rotary spreader, take special care near desirable plants.

SPREADER SETTINGS

SPREADER SETTINGS	DIRECTIONS
Scott's AccuGreen® Drop Spreaders	5 1/2
Scott's PrecisionGreen® Drop Spreaders	5 1/4
Scott's SpeedyGreen® & EdgeGuard® Rotary Spreaders	3 1/4
Scott's EasyGreen® Rotary	26

Additional Spreader Settings:

- EZ Drop, Republic (#530) 6
- EZ Broadcast, Republic (#510) 2
- Scott's Broadcast Tractor Spreader 2

(Non-Scott's spreader settings are approximate. You may need to adjust for proper coverage.)

What to expect

Dandelions and other weeds will be killed in 3 to 4 weeks and your lawn will be greener in 4 to 6 days. Small, lightweight granules mean better weed control. Most lawn weed controls must be absorbed through the weeds' leaves to be effective. Super Turf Builder With Plus 2 Weed Control granules are small and lightweight, so they will stay on even the smallest weed leaves. Weed control in Super Turf Builder With Plus 2 Weed Control is absorbed by the weeds' leaves, killing the plant completely root and all.

Weeds controlled by Super Turf Builder With Plus 2 Weed Control

water	cutweed	knottedweed seedling	purslane
bitter cress	curly dock	lamb-quarter	puffy Florida
black night	dandelion	lappa	ragweed
bristly oxeye	dichondra	malva	scarlet pimpernel

bull thistle	English daisy	morning glory	shepherdspurse
burclover	eveningprimrose	mustard	smartweed
butterweed	filaree	penstemon	sole
carpetweed	florist	peppercorn	stachys
centaury	ground ivy	pigweed	threelobed sandwort
chickweed	heath	plantain	vech
chickweed	henbit	prickly lettuce	white clover
crinkled	horseweed	puncturevine	yellow rocket

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals: CAUTION: causes eye irritation. Harmful if swallowed. Avoid contact with eyes, skin, or clothing. Wear long-sleeved shirt, long pants, socks and shoes. After use, remove all dust and residue before reuse. Wash hands and exposed skin thoroughly with soap and water.
Do not allow people (other than the applicator) or pets on treatment area during application. Do not enter treatment area until spray has dried or dust has settled.
PESTICIDE
If in eyes: Hold eye open, do not blink, flush with water for 15-20 minutes. Remove contact lenses if present after 15 minutes, then continue rinsing eye. If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If swallowed: Call a poison control center immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to infants, children, or pregnant women. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance. If inhaled: Seek medical attention, preferably by mouth-to-mouth, if possible.
Call a poison control center or doctor for treatment advice. Have the product container or label with you when seeking medical attention.

Environmental Hazards: Do not apply when weather conditions favor drift from target areas. Do not apply if rain is expected. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.
