OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

AUG 2 8 2008

Paula Bodey The Scotts Company 14111 Scottslawn Road Marysville, Ohio 43041

Subject:

Winterizer with Plus 2 Weed Control

EPA Registration Number 538-281

Applications dated June 16, 2008 and June 20, 2008

Label and CSF amendments

Dear Ms. Bodey:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended is acceptable. A stamped copy of the label is enclosed for your records.

However, prior to the next printing, or within 30 days, whichever comes first, you must submit revised labeling for Agency review, incorporating the following changes:

- 1) Revise the PRECAUTIONARY STATEMENTS to the following: "CAUTION. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if absorbed through skin. Harmful if swallowed or inhaled. Avoid breathing dust." Move the remaining statements currently found in this section to a second paragraph immediately following. Also make these same revisions to page 16.
- 2) On page 2, revise the subheading IF ON SKIN to IF ON SKIN OR CLOTHING. Also make this revision on page 17.
- 3) Revise the Environmental Hazards section to the following: "2,4-D is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Mecoprop-p may adversely affect non-target plants. Do not contaminate water when disposing of equipment wash waters or rinsate. 2,4-D has properties and characteristics associated with chemicals detected in groundwater. The use of 2,4-D in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater." Also make this revision on page 17.
- 4) In the section STORAGE AND DISPOSAL, revise this section to comply with PR Notice 2001-6 by replacing the PESTICIDE DISPOSAL and CONTAINER DISPOSAL

subsections with the following:

- a. CONTAINER DISPOSAL: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or [toll free number which meets the criteria in paragraph II.E.] for disposal instructions. Never place unused product down any indoor or outdoor drain.
- b. Also, revise the subsection STORAGE title to "PESTICIDE STORAGE"
- c. Make these revisions also on page 16.
- 5) On page 9, in the section DIRECTIONS FOR USE, add the statements "Do not apply this product in a way that will contact any person or pet, either directly of through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled." Also add this on page 16 in the section What to Avoid.
- 6) On page 9, in the section DIRECTIONS FOR USE, add the following statements "Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day." Also add this on page 16 in the section What to Avoid.

The basic formulation amendment and alternate formulation 01, both dated June 17, 2008, of the product referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended are acceptable. The basic CSF and alternate CSF #01 will supercede all previously accepted basic CSFs and alternate CSF A, and will be added to the registration file. In addition, alternate CSFs #2,#3, #4, and #5, all dated June 17, 2008, of the product referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended are acceptable and will also be added to the registration file.

If you have any questions, please contact Hope Johnson at 703-305-5410.

Sincerely,

James A. Tompkins Product Manager 25

Herbicide Branch

Registration Division (7505P)

KEEP OUT OF REACH OF CHILDREN CAUTION PRECAUTIONARY STATEMENTS

<u>Hazards to Humans and Domestic Animals:</u> CAUTION, causes eye irritation. Avoid contact with eyes, or clothing. Wash thoroughly with soap and water after handling. Harmful if swallowed. Do not contaminate feed or foodstuffs. Do not contaminate water used for irrigational or domestic purposes. Do not graze treated areas. Do not feed clippings to livestock. Wear long pants, long-sleeved shirt and shoes when applying this product.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried or dust has settled. When using this product, wear long-sleeved shirt, long pants, socks and shoes. After using this product, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling poison control center or doctor or going for treatment.

Environmental Hazards: Do not apply directly to lakes, streams, or ponds. Do not apply when weather conditions favor drift from target areas. Drift or runoff may adversely affect non-target plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.

Storage and Disposal:

STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing.

PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

Dedicated To A Beautiful World

Trusted by generations of homeowners, Scotts is dedicated to helping you enhance and protect the natural beauty of your home environment.

Helps prepare your lawn for winter...

Summer can leave your lawn stressed and hungry. Researchers at Scotts and leading universities have demonstrated the importance of feeding a lawn in both the summer and fall, and Scotts offers the high quality products you need.

For late summer, a high-nitrogen, slow-release fertilizer like Turf Builder® is your best choice. For fall, a high-nitrogen/potassium fertilizer like that in Scotts Winterizer with Plus 2 Weed Control helps you get a thicker, sturdier lawn with increased root development. When applied in fall, it helps prepare your lawn for winter and provides better green-up next spring.

...clears out more than 50 broadleaf weeds

Late Fall
(Sept.-Nov.)
(4 to 6 weeks after Early Fall Turf Builder feeding)
Apply as last feeding in fall to help prepare your lawn for winter

The Scotts Difference

Unlike ordinary weed & feeds every particle of Winterizer with Plus 2 Weed Control contains: Scotts patented timed-release nitrogen, plus phosphorus, potassium and weed control.

(photo: simple mix particles) ORDINARY MIXED WEED AND FEEDS

Granules contain different nutrients.
 Nutrient and weed control granules of different sizes and shapes can separate during application resulting in uneven, inconsistent feeding and weeding.

(photo: SBS particles) Scotts WINTERIZER WITH PLUS 2 WEED CONTROL

Winterizer with Plus 2 Weed
 Control particles deliver the same
 ratio of nitrogen, phosphorus,
 potassium and weed control to
 every square inch of turf for even,
 consistent feeding, plus better weed
 control.

OR

The Scotts Advantage:
Tiny, Lightweight Particles for Better Weed Control

Weed killers work by entering through the weed leaves. Therefore, it's best to apply a weed & feed to a wet lawn so the particles can stick better to the weeds. Turf Builder Plus 2 Weed and Feed has tiny, lightweight granules that stick to weeds' leaves far better than the larger pellets of other weed killer, for better control.

And unlike most weed & feeds, every Scotts All-in-One* particle contains plant nutrients and the weed control ingredient. Scotts provides consistent feeding and weed control to every square inch of turf for a green, thick lawn with no weeds. Guaranteed!

*All-in-One Particles = nitrogen, phosphorus, potassium and the weed control ingredient contained in every particle.

Turf Builder Plus 2 Weed and Feed (PHOTO) -weed leaves for better weed control

(OPTIONAL BACK PANEL cont'd)

• All-in-One particles contain nutrients and weed control ingredient for green, thick lawns with no weeds.

Ordinary Mixed Fertilizers (PHOTO)

• Nutrients and the weed control ingredient often in separate particles, resulting in inconsistent weed control and feeding.

(BACK PANEL)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year.

How and when to apply

Winterizer with Plus 2 Weed Control helps you get a thicker, sturdier lawn with increased root development. Apply it as your last feeding of the year to help prepare your lawn for winter and provide better greenup next spring.

APPLICATION

- Apply anytime weeds are actively growing (when daytime temperatures are consistently above 60°F).
- Apply on a calm day.
- For best results apply to moist grass. To help particles stick to weed leaves the grass should be thoroughly watered or wet from dew before applying Winterizer with Plus 2 Weed Control.
- On bahiagrass and centipedegrass lawns, wait until after the second mowing of the year, but NOT before mid-March. In the fall, DO NOT treat centipede after the first of October and DO NOT treat bahiagrass after the first of November.
- Do not use this product on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, St. Augustinegrass and dichondra lawns. On bermudagrass, bahiagrass, centipedegrass, zoysiagrass lawns, under certain conditions, some temporary discoloration may result.

WATERING OR RAIN

Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.

This product should not be applied if rain is expected within the next 24 hours.

IMPORTANT

What to expect

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for complete control.

This product will not prevent weed seeds from producing new plants.

Extreme Temperatures

Avoid applying when temperatures are consistently above 90°F.

Seeding/sodding/sprigging

Wait until the new grass has been mowed at least four times before applying Winterizer with Plus 2 Weed Control.

If you are planning to seed, sod, or sprig, you should wait at least one month after you have applied Winterizer with Plus 2 Weed Control.

SPREADER

Spreading Tips

Apply header strips. Then apply product in longest direction of lawn [ART] [ART]

For best results, use a Scotts spreader

Be careful when applying this product near shrubs, flower beds or vegetable gardens as contact with weed control may damage these desirable plants. Scotts spreaders provide excellent controlled application to protect these areas. When using a rotary spreader, take special care near desirable plants.

Spreader Settings

(treats and fertilizes X,XXX sq. ft.)

Scotts AccuGreen Drop Spreader X [Directions] Mow lawn first; apply 2 header strips; apply longest direction of lawn, overlapping wheel marks.

Scotts PrecisionGreen Drop Spreader X [Directions] Mow lawn first; apply 2 header strips; apply longest direction of lawn, overlapping wheel marks.

Scotts Speedy Green & EdgeGuard Rotary Spreaders X [Directions] Make each pass about 5 feet from previous pass to overlap spread width.

Additional Spreader Settings

DO NOT USE ON ST. AUGUSTINEGRASS, CARPETGRASS, DICHONDRA, or LIPPIA,

Why Scotts Winterizer with Plus 2TM Weed Control is better than the rest:

Granule Size

Scotts' tiny, lightweight granules stick to weed leaves far better than the larger, heavier pellets of other weed & feeds. The better the product adheres to the weed leaves, the better the results!

Scotts Mistake Proof GranulesTM

Each Scotts individual granule contains both the weed control ingredient and fertilizing nutrients – every inch of your lawn receives the proper amount of both. Common weed & feeds utilize separate pellets for each ingredient, resulting in hit-or-miss weed control and fertilization.

OR

The Scotts Advantage:

Tiny, Lightweight Particles For Better Weed Control

Weed killers work by entering through the weeds' leaves. Therefore, it's best to apply a weed & feed to a wet lawn, so the particles can stick better to weeds. Winterizer Plus 2 Weed and Feed has tiny, lightweight granules that stick to weed leaves far better than the larger pellets of other weed killers, for better control.

And unlike most weed & feeds, every Scotts All-in-One* particle contains plant nutrients and the weed control ingredient. Scotts provides consistent feeding and weed control to every square inch of turf for a green, thick lawn with no weeds. Guaranteed!

1/20

Unlike other weed & feeds, every particle of Winterizer With Plus 2 Weed Control contains: Scotts patented timed-release nitrogen, phosphorus, potassium and weed control.

*All-in-One Particles= nitrogen, phosphorus, potassium and the weed control ingredient contained in every particle.

Scotts Winterizer with Plus 2 Weed Control (PHOTO)

-weed leaves for better weed control

• All-in-One particles contain nutrients and weed control ingredients for green, thick lawns with no weeds.

Winterizer With Plus 2 Weed Control particles deliver the same ratio of nitrogen, phosphorus, potassium and weed control to every square inch of turf for even, consistent feeding plus better weed control.

Ordinary Mixed Weed & Feeds (PHOTO)

Granules contain different nutrients. Nutrients and weed control granules of different sizes and shapes can separate during application resulting in uneven, inconsistent feeding and weeding.

KEY PRODUCT FACTS

Directions For Use It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Make sure that the grass is wet

from dew or sprinkling before applying. (This

helps particles adhere to weed leaves to produce best results.)

2. Set spreader to the setting indicated by the chart on right before applying.

Master Label

1/20

SPREADER

Spreading Tips

Apply header strips. Then apply product in longest direction of lawn [ART] [ART]

For best results, use a Scotts spreader

Be careful when applying this product near shrubs, flower beds or vegetable gardens as contact with weed control may damage these desirable plants. Scotts spreaders provide excellent controlled application to protect these areas. When using a rotary spreader, take special care near desirable plants.

Spreader Settings

(treats and fertilizes X,XXX sq. ft.)

Scotts AccuGreen Drop Spreader X [Directions] Mow lawn first; apply 2 header strips; apply longest direction of lawn, overlapping wheel marks.

Scotts PrecisionGreen Drop Spreader X [Directions] Mow lawn first; apply 2 header strips; apply longest direction of lawn, overlapping wheel marks.

Scotts Speedy Green & EdgeGuard Rotary Spreaders X [Directions] Make each pass about 5 feet from previous pass to overlap spread width.

Additional Spreader Settings

(Non-Scotts spreader settings are approximate. You may need to adjust for proper coverage.)

What To Avoid

- Do not water or mow lawn for at least 24 hours after application. (Granules must remain on weed leaves for 24 hours to be effective.)
- Apply any time weeds are actively growing (when daytime temperatures are consistently above 60°F.
- For best results apply to moist grass. To help particles stick to weed leaves, the grass should be thoroughly watered or wet from dew before applying Winterizer With Plus 2 Weed Control.
- Do not apply if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60° or above 90° F.

ART

- For maximum product effectiveness, keep people and animals off lawn after treatment.
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Grass should not touch the bottom of a drop spreader. Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed four times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.

ART

Do not use this product on flowers, shrubs, fruit, or vegetable plants or on creeping bentgrass, St.

Augustinegrass, dichondra lawns.

On Bermudagrass, bahiagrass, centipedegrass, zoysiagrass lawns, under certain conditions, some temporary discoloration may result.

- On bahia or centipedegrass lawns, wait until after the second mowing of the year, but NOT before mid-March.
- In fall, DO NOT treat centipedegrass after Oct. 1, nor bahiagrass after Nov. 1.
- Apply on a calm day.
- This product applies XX pounds of 2,4-D per acre per application. Do not apply more than twice per year.

Storage and Disposal

STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing.

- PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.
- CONTAINER DISPOSAL: Do not reuse bag. Discard bag in trash.

First Aid and Environmental Information

CAUTION! Keep out of the reach of children and pets.
Causes eye irritation.
Harmful if swallowed.

PRECAUTIONARY STATEMENTS Hazards to Humans and Domestic Animals

ART

Avoid contact with eyes, skin or clothing. Wear long pants, long-sleeved shirt, socks and shoes when applying this product. After use, remove clothing and launder separately before reuse. Wash hands and exposed skin thoroughly with soap and water. Do not contaminate feed or foodstuffs. Do

not contaminate water used for irrigation or domestic purposes. Do not graze treated areas. Do not feed clippings to livestock. Do not allow people (other than applicator) or pets on treatment area during application, or after treatment until spray has dried or dust (if any) has settled.

First Aid

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. If swallowed: Call a poison control center or doctor immediately for treatment

advice. Have person sip a glass of water, if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Environmental Hazards

Do not apply directly to lakes, streams, or ponds. Do not apply when weather conditions favor drift from target areas. Drift or runoff may adversely affect nontarget plants. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.
