UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

JAN 26 2010

Ms. Jessica McLaughlin
The Scotts Company
14111 Scottslawn Road
Marysville, Ohio 43041

Subject: Winterizer with Plus 2 Weed Control
EPA Registration Number 538-281
Notification application dated November 17, 2009
Transferred to Amendment

Dear Ms. McLaughlin:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act as amended is acceptable, provided you make the following changes before you release the product for shipment:

- 1) On page 2, reduce the claims of "50" weeds to a number that is no more than the number of weeds listed in the "Weeds Controlled" section
- 2) On page 5, remove the word "natural" from "...natural beauty of your home...."
- 3) On page 5 and 13, the "XX" must not exceed the number of weeds listed in the "Weeds Controlled" section
- 4) On pages 6-8, 14, revise all "Annual Program" text and references to clearly specify to the user that following such programs is advisory and not mandatory, and clearly indicate to the user that they may use the listed products only if specified pest(s) are a problem (ex: If weeds are a problem, it is recommended you use....")
- 5) Remove "Unlike ordinary weed & feeds" from The Scotts Difference on page 8
- 6) On page 8, remove bullet #1 referencing Ordinary Mixed Weed And Feeds
- 7) On page 8, remove "better than the larger pellets of other weed killer, for better control"
- 8) On page 8, remove "And unlike most weed & feeds"
- 9) On page 9, remove the bullet and heading "Ordinary Mixed Fertilizers"
- 10) On page 14, remove "is better than the rest," "better than the larger pellets of other weed killer, for better control," and "Common weed and feeds utilize...." from the section Why Scotts Winterizer With Plus 2 Weed Control is better than the rest"
- 11) On page 14, remove "Better" from "Tiny, Lightweight Particles for Better Weed Control." Also remove "better than the larger pellets of other weed killer, for better control"
- 12) On page 15, remove "And unlike most weed and feeds" and "Unlike most weed and feeds"
- 13) On page 15, remove the sections "Ordinary Mixed Weed & Feeds" and "Ordinary Mixed Fertilizers"

Page 2

EPA Registration Number 538-281

Amended labeling will supercede all previously accepted ones. A stamped copy of labeling is enclosed for your records. Submit one (1) copy of final printed labeling before you release the product for shipment.

Please note that the optional claim "Available only at authorized Scotts Lawn Pro retailers" may be contradictory if this product is sold at retailers other than Scotts Lawn Pro retailers. Submit an explanation of this statement with the required final printed labeling.

If you have any questions, please contact Hope Johnson at 703-305-5410.

Sincerely,

James A. Tompkins
Product Manager 25
Herbicide Branch
Registration Division (7505P)

KEEP OUT OF REACH OF CHILDREN

CAUTION

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION, causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if absorbed through skin. Harmful if swallowed or inhaled. Avoid breathing dust. Prolonged or frequently repeated skin contact may cause allergic reaction in some people.

Wash thoroughly with soap and water after handling. Do not contaminate feed or foodstuffs. Do not contaminate water used for irrigational or domestic purposes. Do not graze treated areas. Do not feed clippings to livestock.

Do not allow people (other than applicator) or pets on treatment area during application. Do not enter treatment areas until spray has dried or dust has settled. Wear long pants, long sleeved shirt, socks and shoes when applying this product. After using this product, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water.

FIRST AID

If in eyes : Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling poison control center or doctor or going for treatment.

(BACK PANEL cont'd)

Environmental Hazards: 2,4-D is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Mecoprop-p may adversely affect non-target plants. Do not contaminate water when disposing of equipment wash waters or rinsate. 2,4-D has properties and characteristics associated with chemicals detected in groundwater. The use of 2,4-D in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

Storage and Disposal:

PESTICIDE STORAGE: Store in a clean, dry place. Reseal opened bag by folding top down and securing.

CONTAINER DISPOSAL: If empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Dedicated To A Beautiful World

Trusted by generations of homeowners, Scotts is dedicated to helping you enhance and protect the natural beauty of your home environment.

Helps prepare your lawn for winter...

Summer can leave your lawn stressed and hungry. Researchers at Scotts and leading universities have demonstrated the importance of feeding a lawn in both the summer and fall, and Scotts offers the high quality products you need.

For late summer, a high-nitrogen, slow-release fertilizer like Turf Builder® is your best choice. For fall, a high-nitrogen/potassium fertilizer like that in Scotts Winterizer with Plus 2 Weed Control helps you get a thicker, sturdier lawn with increased root development. When applied in fall, it helps prepare your lawn for winter and provides better green-up next spring.

...clears out more than XX broadleaf weeds

(OPTIONAL BACK PANEL CLAIMS)

Now it's easy for you to have a better lawn

Save money

Why even consider a lawn care service?
Scotts Annual Program will give you a beautiful lawn for less money.

Or

Why even consider a lawn care service?
Scotts Lawn Pro Annual Program will give you a beautiful lawn for about one-third the cost.

Simple and easy

No more guesswork. You simply apply the right product – one Step at a time.

Start anytime

You can begin the Annual Program anytime of the year. Just check the month and select the appropriate Step listed. Apply the remaining Steps at two-month intervals.

Guaranteed results

Each Step is designed to the specific season to help give you a greener lawn.

Step 1. Early Spring February-April	Step 2. Late Spring April-June	Step 3. Summer June-August	Step 4. Fall August-November
Crabgrass Preventer plus Fertilizer – prevents crabgrass, foxtail, spurge, oxalis, chickweed and other annual weeds while providing deep, thick greening for up to 2 months. This is Scotts best fertilizer plus crabgrass preventer. In the Pacific Northwest, Step™ 1 is “Moss Control plus Fertilizer”.	Weed Control Plus Fertilizer – controls dandelions, clover, chickweed and other broadleaf weeds while greening your lawn for up to 2 more months. This is Scotts best weed and feed.	Insect Control plus Fertilizer – controls white grubs, chinch bugs, sod webworms and other lawn insects plus keeps your lawn green through the Summer.	Lawn Fertilizer – specially formulated for the Fall – the best time to develop a stronger root system for a more vigorous, thicker lawn. Helps your lawn green up even quicker next Spring. This is Scotts best fall fertilizer.

Winterizer

Additional Winterizer Feeding

September – November

4 to 6 weeks after Early Fall fertilizer feeding. Apply as last feeding in fall to help prepare your lawn for winter.

(OPTIONAL BACK PANEL cont'd)

Optional Winterizer Feeding

Late Fall

(Sept.–Nov.)

(4 to 6 weeks after Early Fall Turf Builder feeding)

Apply as last feeding in fall to help prepare your lawn for winter

The Scotts Difference

Unlike ordinary weed & feeds every particle of Winterizer with Plus 2 Weed Control contains: Scotts patented timed-release nitrogen, plus phosphorus, potassium and weed control.

(photo: simple mix particles)

ORDINARY MIXED WEED AND FEEDS

- Granules contain different nutrients. Nutrient and weed control granules of different sizes and shapes can separate during application resulting in uneven, inconsistent feeding and weeding.

(photo: SBS particles)

Scotts WINTERIZER WITH PLUS 2 WEED CONTROL

- Winterizer with Plus 2 Weed Control particles deliver the same ratio of nitrogen, phosphorus, potassium and weed control to every square inch of turf for even, consistent feeding, plus better weed control.

OR

The Scotts Advantage:

Tiny, Lightweight Particles for Better Weed Control

Weed killers work by entering through the weed leaves. Therefore, it's best to apply a weed & feed to a wet lawn so the particles can stick better to the weeds. Turf Builder Plus 2 Weed and Feed has tiny, lightweight granules that stick to weeds' leaves better than the larger pellets of other weed killer, for better control.

And unlike most weed & feeds, every Scotts All-in-One* particle contains plant nutrients and the weed control ingredient. Scotts provides consistent feeding and weed control to every square inch of turf for a green, thick lawn with no weeds. Guaranteed!

*All-in-One Particles = nitrogen, phosphorus, potassium and the weed control ingredient contained in every particle.

(BACK PANEL)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product applies 1.5 pounds of 2,4-D per acre per application. The maximum number of broadcast applications per treatment site is two per year. Allow a minimum of 30 days between applications.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.

Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, or oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day.

How and when to apply

Winterizer with Plus 2 Weed Control helps you get a thicker, sturdier lawn with increased root development. Apply it as your last feeding of the year to help prepare your lawn for winter and provide better greenup next spring.

APPLICATION

- Apply when weeds are actively growing (when daytime temperatures are consistently above 60°F).
- Apply on a calm day.
- For best results apply to moist grass. To help particles stick to weed leaves the grass should be thoroughly watered or wet from dew before applying Winterizer with Plus 2 Weed Control.
- On bahia and centipedegrass lawns, wait until after the second mowing of the year, but NOT before mid-March. In the fall, DO NOT treat centipede after the first of October and DO NOT treat bahia after the first of November.
- Do not use this product on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, St. Augustinegrass and dichondra lawns. On bermudagrass, bahiagrass,

Bold, italicized text is information for the reader and is not part of the label.
[Bracketed information is optional text.] Text separated by / denotes and/or options.

(BACK PANEL cont'd)

centipede grass, zoysiagrass lawns, under certain conditions, some temporary discoloration may result.

WATERING OR RAIN

Do not water your lawn for 24 hours after application. Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.

This product should not be applied if rain is expected within the next 24 hours.

IMPORTANT

What to expect

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for control.

This product will not prevent weed seeds from producing new plants.

Extreme Temperatures

Avoid applying when temperatures are consistently above 90°F.

Seeding/sodding/sprigging

Wait until the new grass has been mowed at least four times before applying Winterizer with Plus 2 Weed Control.

If you are planning to seed, sod, or sprig, you should wait at least one month after you have applied Winterizer with Plus 2 Weed Control.

SPREADER

Spreading Tips

Apply header strips. Then apply product in longest direction of lawn

[ART] [ART]

For best results, use a Scotts spreader

Be careful when applying this product near shrubs, flower beds or vegetable gardens as contact with weed control may damage these desirable plants. Scotts spreaders provide excellent controlled application to protect these areas. When using a rotary spreader, take special care near desirable plants.

NOTE TO PM: In the Scotts Annual Lawn Care Program, we have the text above for "SUMMER" and two other optional texts:

[Summer June-Aug. Fertilizes and protects against insects, heat and drought]

[Summer June-Aug. Fertilizes for recovery from summer stresses and protects against insects]

Why Scotts Winterizer with Plus 2™ Weed Control is better than the rest:

Granule Size

Scotts' tiny, lightweight granules stick to weed leaves better than the larger, heavier pellets of other weed & feeds. The better the product adheres to the weed leaves, the better the results!

Scotts Mistake Proof Granules™

Each Scotts individual granule contains both the weed control ingredient and fertilizing nutrients – every inch of your lawn receives the proper amount of both. Common weed & feeds utilize separate pellets for each ingredient, resulting in hit-or-miss weed control and fertilization.

OR

The Scotts Advantage:

Tiny, Lightweight Particles For Better Weed Control

Weed killers work by entering through the weeds' leaves. Therefore, it's best to apply a weed & feed to a wet lawn, so the particles can stick better to weeds. Winterizer Plus 2 Weed and Feed has tiny, lightweight granules that stick to weed leaves better than the larger pellets of other weed killers, for better control.

Note to PM:

What To Avoid

- Do not water or mow lawn for at least 24 hours after application. (Granules must remain on weed leaves for 24 hours to be effective.)
- Apply when weeds are actively growing (when daytime temperatures are consistently above 60°F.
- For best results apply to moist grass. To help particles stick to weed leaves, the grass should be thoroughly watered or wet from dew before applying Winterizer With Plus 2 Weed Control.
- Do not apply if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60° or above 90° F.

ART

- For maximum product effectiveness, keep people and animals off lawn after treatment.
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Grass should not touch the bottom of a drop spreader. Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed four times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.

ART

- Do not use this product on flowers, shrubs, fruit, or vegetable plants or on creeping bentgrass, St. Augustinegrass, dichondra lawns. On Bermudagrass, bahiagrass, centipedegrass, zoysiagrass lawns, under certain conditions, some temporary discoloration may result.
- On bahia or centipedegrass lawns, wait until after the second mowing of the year, but NOT before mid-March.
- In fall, DO NOT treat centipedegrass after Oct. 1, nor bahiagrass after Nov. 1.
- Apply on a calm day.
- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn or garden, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day.
- This product applies 1.5 pounds of 2,4-D per acre per application. Do not

apply more than twice per year. Allow a minimum of 30 days between applications.

with soap and water. Do not contaminate feed or foodstuffs. Do not contaminate water used for irrigation or domestic purposes. Do not graze treated areas. Do not feed clippings to livestock. Do not allow people (other than applicator) or pets on treatment area during application, or after treatment until spray has dried or dust (if any) has settled.

Storage and Disposal

- **PESTICIDE STORAGE:** Store in a ART clean, dry place. Reseal opened bag by folding top down and securing.

- **CONTAINER DISPOSAL:** **If empty:** Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

First Aid and Environmental Information

**PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals**

ART CAUTION, causes moderate eye irritation.

ART Avoid contact with eyes, skin or clothing. Harmful if absorbed through skin. Harmful if swallowed or inhaled. Avoid breathing dust. Prolonged or frequent repeated skin contact may cause allergic reaction in some people.

Wear long pants, long-sleeved shirt, socks and shoes when applying this product. After use, remove clothing and launder separately before reuse. Wash hands and exposed skin thoroughly

First Aid

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water, if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Environmental Hazards

2,4-D is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Mecoprop may adversely affect non-target plants. Do not contaminate water when disposing

of equipment wash waters or rinsate. 2,4-D has properties and characteristics associated with chemicals detected in groundwater. The use of 2,4-D where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.
