The Scotts Advantage[™]:

Tiny, Lightweight Particles For Better Weed Control

Weed killers work by entering through the weeds leaves. Therefore, it's best to apply a weed & feed to a wet lawn, so the particles can stick better to the weeds. Scotts Turf Builder[®] With Plus 2[®] has tiny, lightweight granules that stick to weed leaves far better than the larger pellets of other weed killers, for better control.

And unlike most weed & feeds, every Scotts All-in-One[®] particle[™] contains plant nutrients and the weed control ingredient. Scotts provides consistent feeding and weed control to every square inch of turf for a green, thick lawn with no weeds. Guaranteed!

* All-in-One = nitrogen, phosphorus, potassium and the weed control ingredient contained in every particle

Turf Builder[®] With Plus 2[®]

- Tiny, lightweight particles stick to weed leaves for better weed control
- All-in-One[®] particles contain nutrients and the weed control ingredient for green, thick lawns with no weeds

Ordinary Mixed Fertilizers

- Larger pellets don't stick as well to weed leaves
- Nutrients and the weed control ingredient often in separate particles, resulting in inconsistent weed control and feeding

KEY PRODUCT FACTS

- Do not apply if day temperatures are regularly below 60° or above 90°F.
- For maximum product effectiveness, keep people and animals off lawn after treatment.

- Grass should not touch the bottom of a drop spreader. Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed four times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.
