Marysville, OH 43041

Subject: Notification per PRN 98-10 – Add/revise fertilizer marketing claims
Product Name: TURF BUILDER PLUS 2
EPA Registration Number: 538-282
Application Date: January 25, 2023
Decision Number: 589864

Dear Mr. Zemanek:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The label submitted with the application has been stamped “NOTIFICATION” and placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, please contact me at ondish.mindy@epa.gov or at (202)566-2857.

Sincerely,

A handwritten signature in cursive script that reads "Mindy Ondish".

Mindy Ondish
Product Manager 23

[FIRST AID AND ENVIRONMENTAL INFORMATION]

[KEEP OUT OF REACH OF CHILDREN]

[CAUTION]

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals [icon: human and dog]

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear long-sleeved shirt, long pants, shoes and socks. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

Note to PM:

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options.

Highlighted text is new. ~~Strike through text is being deleted~~

FIRST AID [icon: cross]

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling poison control center or doctor, or going for treatment. [For emergency information call 1-800-543-8873.]

Environmental Hazards [icon]

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

Note to PM:

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options.

Highlighted text is new. ~~Strike through text is being deleted~~

Directions for Use

Directions for Use *Option 1*

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product applies 1.5 pounds of 2,4-D per acre per application.

Application Restrictions

- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. Do not allow people or pets to enter treated areas until dusts have settled.
- Do not use this product on flowers, shrubs, fruit or vegetable plants or on creeping bentgrass, St. Augustine, dichondra, Floratam, carpetgrass or lippia lawns.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day.
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- The maximum number of broadcast applications per treatment site is two per year.
- A minimum of 30 days between applications is required.

Application Precautions

- Apply when weeds are actively growing (when daytime temperatures are consistently between 60°F and 90°F.).
- Grass wet with dew or thoroughly-watered grass helps particles stick to weed leaves.
- In Spring treat bahia and centipede lawns mid-March or later after the second mowing. In Fall, treat centipede lawns before October 1 and bahia lawns before November 1.
- [Grass should not touch the bottom of a drop spreader.] Tall grass should be mowed a day or two before application.

Watering or Rain

This product may be applied if rain is not expected in the next 24 hours.

Do not water or mow lawn for at least 24 hours after application. [(Granules must remain on weed leaves for 24 hours to be effective.)]

IMPORTANT

What to Expect

Weed stems and leaves will begin to twist and curl in a few days, but a month or more may be required for control. This product will not prevent weed seeds from producing new plants.

Under certain conditions, temporary discoloration may occur on bahia, centipede, bermudagrass, and zoysiagrass lawns.

Note to PM:

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options.

	fleabane	pepperweed/peppergrass	wild carrot
chickweed/stitchwort (Stellaria spp.)	ground ivy	pigweed	yarrow
chicory	hawkweed	plantain (broadleaf)	yellow rocket

Seeding/Sodding/Sprigging

Wait at least one month after you have applied this product before seeding, sodding or sprigging.

Mow new grass at least 4 times before applying.

Note to PM: End of Option 1

Directions for Use Option 2

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product applies 1.5 pounds of 2,4-D per acre per application.

Application

- Apply on a calm day.
- Make sure that the grass is wet from dew or sprinkling before applying. (This helps particles adhere to weed leaves to produce best results.)
- Set spreader to the setting indicated by the chart below [before applying].

Restrictions

- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. Do not allow people or pets to enter treated areas until dusts have settled.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day.

Note to PM:

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options.

Highlighted text is new. Strike-through text is being deleted

- Do not apply more than twice per year. A minimum of 30 days between applications is required.
- Do not water or mow lawn for at least 24 hours after application. [(Granules must remain on weed leaves for 24 hours to be effective.)]
- Do not apply if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60° F or above 90° F.
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- [Grass should not touch the bottom of a drop spreader.] Tall grass should be mowed a day or two before application.
- Delay application on newly seeded, sodded or sprigged areas until new grass has been mowed four times.
- Do not seed, sod or plant grass sprigs until at least one month after using this product.
- Do not apply on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass.
- On bahia or centipede grass lawns, wait until after the second mowing of the year, but not before mid-March.
- In fall, DO NOT treat centipede grass after Oct. 1, nor bahiagrass after Nov. 1.

Controls [the following] Weeds/Weeds Controlled:

Highlighted text is new. Strike-through text is being deleted

- Set spreader to the setting indicated by the chart below before applying. Fill spreader over bare ground or hard surface.
- Apply one or two header strips, then apply in longest direction of lawn. Shut off spreader each time you reach the header strip, or stop.
- Sweep or blow stray particles from hard surfaces back onto lawn area. Clean spreader away from hard surfaces or storm drains.
- One month after using this product, it is okay to seed, sod or plant grass sprigs.
- Mow grass 4X before applying on newly seeded, sodded or sprigged areas.

Restrictions

- Do not allow product to contact people or pets directly or through drift. Keep people and pets off lawn during application. Do not allow people or pets to enter treated areas until dusts have settled.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day. Do not apply this product if rain is expected within 24 hours.
- Do not apply if day temperatures are regularly below 60° F or above 90° F.
- Do not mow or water lawn for at least 24 hours after application. [(Granules must remain on weed leaves for 24 hours to be effective.)]
- Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetables.
- Do not apply this product on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass.
- Do not apply before the second mowing of the year and before mid-March on bahia or centipedegrass lawns.
- Do not treat centipedegrass after Oct. 1 and bahiagrass after Nov. 1.
- Do not apply to hard surfaces like driveways or streets. Apply only to grass.
- Apply no more than twice per year.
- A minimum of 30 days between applications is required.

Easy to Follow Instructions

Apply with a drop or rotary spreader. For best results, use a Scotts spreader.

Step 1 Make sure that the grass is wet from dew or sprinkling before applying.

- This helps particles adhere to weed leaves to produce best results.

Step 2 Set and fill spreader.

- Set spreader to the setting indicated by the chart below.

Step 3 Apply product.

Note to PM:

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options.

Highlighted text is new. Strike-through text is being deleted

- Apply on a calm day.
- Do not water or mow lawn for at least 24 hours after application. [Granules must remain on weed leaves for 24 hours to be effective.]
- Delay application if rain is expected within 24 hours.
- Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn. Optional Florida Environmental statements. Note to PM: Label placement here is optional

Step 4 Clean-up.

- Return unused product to original container and store out of reach of children and pets.
- [Sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.] Optional Florida Environmental statement. Note to PM: Label placement here is optional
- [To keep lawn products from reaching storm sewers, sweep or blow any stray particles from hard surfaces back onto lawn area. Do not clean spreader over hard surfaces or near storm drains.] Optional

Step 5 Enjoy your lawn.

Note to PM: End of Option 5

QUICK START GUIDE Option 6

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This product applies 1.5 pounds of 2,4-D per acre per application.

[*Insert company name*] Quick Start Guide

[You're just three/four/a few [simple/easy] steps away from a beautiful *insert company name* lawn]

[ICON – Spreader/Dial]

[1.] Fill & Set Spreader

[*Insert company name* Broadcast/Rotary Spreaders] [X]

[*Insert company name* Drop Spreaders] [X]

[Use [only] with *insert company name* spreaders/applicators.]

[*Insert company name* products are designed to work with *insert company name* spreaders/applicators.]

[For additional spreader settings, [please] call *insert company phone number*.]

[This package applies 2.86 [2.9] lbs of product per 1,000 sq. ft.]

[ICON – Spreader/Lawn]

[2.] Apply

Apply on a calm day.

Apply to moist grass. [Make sure that the grass is wet from dew or sprinkling before applying.] [This helps particles adhere to weed leaves to produce best results.]

Apply when weeds are actively growing (when daytime temperatures are consistently between 60°F and 90°F.).

Tall grass should be mowed a day or two before application.

For even application walk at a steady pace slightly overlapping each pass.

Scotts Drop Spreaders: Align hopper arrow with previous wheel track.

Insert company website [icon – computer mouse]

[Watering or Rain]

- Do not water your lawn for 24 hours after application or apply if rain is expected within the next 24 hours. [Water will wash the weed control off the weed's leaves and reduce the effectiveness of this product.]

[Extreme temperatures]

- [Avoid applying when temperatures are above 90° F.]

[Seeding/Sodding/Sprigging]

- Delay application on newly seeded, sodded, or sprigged areas until new grass has been mowed 4 times.
- Wait at least one month after using this product to seed, sod or plant grass sprigs.

Restrictions

- Do not apply more than twice per year.
- A minimum of 30 days between applications is required.
- Apply only to grass. Do not allow granules or dust to drift onto flowers, shrubs, fruit or vegetable plants.
- Do not apply on St. Augustinegrass, Floratam, dichondra, lippia, carpetgrass or bentgrass. On Bermudagrass, bahia, centipedegrass, zoysia lawns, under certain conditions, some temporary discoloration may result.
- On bahia and centipede lawns, wait until after the second mowing of the year but NOT before mid-March. In the fall, DO NOT treat centipede after the first of October and DO NOT treat bahia after the first of November.
- Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn and sweep any product landing on the driveway, sidewalk, gutter, or street, back onto the treated area. To prevent product run-off, do not over water the treated area to the point of runoff or apply when raining or when rain is expected that day.

SPREADER SETTING OPTIONS

SPREADER SETTING INFORMATION Note to PM: The following are optional formats to present spreader setting information. Appropriate spreader settings, spreader brand names, coverage will be inserted on Final Printed Label

Optional Florida Environmental statement. Note to PM: Label placement in front of [within]any spreader settings section is optional:

[Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk or street, back onto your lawn.]

[This package applies 2.86 [2.9] lbs of product per 1,000 sq. ft.][Covers X,XXX sq ft]

Tips on Spreading

Scotts Drop/ **insert brand name** :

- Do not apply during windy days.
- First apply 2 header strips.
- Overlap spreader application area to avoid strips of untreated lawn.
- Shut off spreader when you reach the header strip or any time you stop.

EasyGreen® Rotary/ **insert brand name** :

- Slide shut-off lever to the right, application automatically starts and stops when you do
- Avoid misses by making each pass about 30 inches from the previous one so some overlapping occurs

Scotts Spreader Settings

	Spreader Setting (covers X,XXX sq ft)
Scotts Drop Spreaders	XX
Scotts EasyGreen™ Rotary	XX
Scotts SpeedyGreen™ Rotary	XX
Scotts Hand-Held Spreaders	XX

Additional Spreader Settings

(Non-Scotts spreader settings are approximate. You may need to adjust for proper coverage).

For even application walk at a steady pace slightly overlapping each pass.

Scotts Drop Spreaders: Align hopper arrow with previous wheel track.

Scotts Broadcast/Rotary Spreaders: Line up each pass approximately 5 ft. from wheel track.

Scotts Hand-Held Spreaders: Line up each pass [approximately] 3 ft from the center of previous pass.

(The following instructions to be used on 1,000 sq ft shaker container only)

APPLICATION RATE (Actual Size)

contents of this package covers a
25 ft. by 40 ft. area (1,000 sq ft)

[Picture of
shaker carton]

Use lightweight shaker
carton to sprinkle evenly
over lawn as shown.

If you have questions

We designed this program to make having a better lawn as simple and easy as possible. But you may still have some questions about your lawn during the year. If so, you can contact the Scotts Lawn Pro retailer where you bought this program. They are ready to answer your questions and provide any help or information that you may need - OR-You can get the answer by talking directly with one of Scotts lawn counselors. Simply dial this toll-free number 1-800-543-TURF (in Ohio 1-800-762-4010).

Spreading Tips

For best results, use a Scotts spreader

	Spreader Setting REGULAR RATE covers 5,000 sq.ft.	DIRECTIONS
Scotts Drop Spreaders/ <i>insert brand name</i>	X	Mow lawn first; apply 2 longest direction of lawn, overlapping wheel marks.
Scotts EasyGreen® Rotary/ <i>insert brand name</i>	X	Make each pass about XX header strips; apply inches from previous pass to overlap spread width.
Scotts SpeedyGreen® Rotary/ <i>insert brand name</i>	X	Make each pass about X feet from previous pass to overlap spread width.
Scotts Hand-Held Spreaders / <i>insert brand name</i>	X	Line up each pass [about] 3 ft from the center of previous pass.

When Using A Drop Spreader: Mow lawn first if grass is tall enough to touch the bottom of the spreader. First apply two header strips. Then operate spreader the longest way of the lawn. Overlap wheel marks to insure uniform feeding. Shut off spreader when you have reached the header strips or when you have stopped.

When Using A Rotary Spreader: Shut-off spreader any time you stop. For complete coverage make each pass according to spreader manufacturer's directions so some overlapping occurs.

[Spreader Settings] Covers XXXX sq. ft.

[Spreading Tips]

Apply header strips. Then apply product in longest direction of lawn. For best results, use a Scotts® spreader. [Shut off spreader or stop each time you reach a header strip.]

[art-Broadcast/Rotary spreaders] [art-Drop Spreaders] [art-Hand-held spreader]

Scotts Broadcast/Rotary Spreaders/ *insert brand name* X

Each pass should be within 5 feet of each other to ensure an overlap.

Scotts Basic®, Standard™, Deluxe™, Edgeguard®, Lawn Pro® or SpeedyGreen®

Scotts EasyGreen®/ *insert brand name* Each pass should be within 30" of each other to ensure an overlap.

Scotts Drop Spreaders X

Make sure spreader wheel completely overlaps previous wheel marks.

Scotts AccuGreen®/ *insert brand name*

Scotts(R) Hand-Held Spreaders/ *insert brand name* X

Line up each pass [approximately] 3 ft from the center of previous pass.

[Settings] X,X,X For additional spreader settings, please call 1-800-543-TURF (8873).

Won't Burn Lawn

[art] Weed

[photo]
This lawn is starving and has weeds

[photo]
This lawn was fed with Insert Product Name

[photo] Treated

[photo] Untreated

XX NITROGEN	X PHOSPHORUS	X POTASSIUM
Essential for plant growth; makes grass green.	Stimulates root growth; helps grass multiply.	Makes plant strong; better able to resist drought and extreme heat.

[APPLICATION]

How and When to Apply

Apply in late spring, summer, or fall. For use on bahia, bermuda, bluegrass, centipede, fescue, ryegrass, or zoysia lawns.

DO NOT USE ON ST. AUGUSTINEGRASS, FLORATAM, DICHONDRA, LIPPIA, CARPETGRASS OR BENTGRASS LAWNS.

How Much is Enough?

To determine the square footage of your lawn, walk the length and width of your lawn; one average pace equals about 3 feet. Multiply the length of the lawn by the width of the lawn. This equals the area of your lawn in square feet. NOTE: If your lawn has an irregular shape, measure square areas, then add the figures together to reach your total lawn size.

Scotts & Your Environment >> [art-Scotts]

We care.

Scotts products are designed with care to grow thicker, greener lawns.

[Because] A Green Lawn is A Good Lawn.

A healthy lawn can clean the air, produce oxygen and prevent runoff and soil erosion.

You can make a difference.

Help keep our water resources clean. Apply this product only to your lawn, and sweep any product that lands in the driveway, sidewalk or street back onto your lawn.

Tips for Lawncare Success:

Feed regularly for your best lawn. Regular feedings of Scotts Turf Builder will help build a lawn you and your family can enjoy. Scotts Turf Builder provides the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought and family activity.

Mow your lawn high. Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively.

Leave the grass clippings on your lawn. This recycles the plant nutrients back into the soil.

Conserve water. Your lawn will begin to wilt when water is needed. As much as possible, take advantage of nature's sprinkler and rely on the rain to water your lawn

Step 1. Early Spring February-April	Step 2. Late Spring April- June	Step 3. Summer June- August	Step 4. Fall August-November
Crabgrass Preventer plus Fertilizer - prevents crabgrass, foxtail, spurge, oxalis, chickweed and other annual weeds while providing deep, thick greening for up to 2 months. This is Scotts best fertilizer plus crabgrass preventer. In the Pacific Northwest, Step™ 1 is "Moss Control plus Fertilizer".	Weed Control Plus Fertilizer - controls dandelions, clover, chickweed and other broadleaf weeds while greening your lawn for up to 2 more months. This is Scotts best weed and feed.	Insect Control plus Fertilizer - controls white grubs, chinch bugs, sod webworms and other lawn insects plus keeps your lawn green through the Summer.	Lawn Fertilizer - specially formulated for the Fall - the best time to develop a stronger root system for a more vigorous, thicker lawn. Helps your lawn green up even quicker next Spring. This is Scotts best fall fertilizer.

Scotts tiny, lightweight granules provide two advantages:

- 1) They stick to weed leaves
- 2) They spread evenly for better weed control and feeding. The better the product adheres to the weed leaves, the better the results!

The Scotts Advantage®:

Tiny, Lightweight Particles For Better Weed Control

Weed killers work by entering through the weeds' leaves. Therefore, its best to apply this product to a wet lawn, so the particles can stick better to the weeds. Insert Product Name has tiny, lightweight granules that stick to weed leaves for better control of broadleaf weeds.

OR

The Scotts Advantage®:

Each of Scotts exclusive All-in-One Particles® contains the guaranteed feeding nutrients and the weed control ingredients to provide consistent feeding and weed control to every treated square inch of your lawn. The result: A thick, green lawn without burning. GUARANTEED.

- All-in-One Particles® = nitrogen, phosphorus, potassium and the weed control ingredient contained in [on] every particle.

OR

- All-in-One Particles® = nitrogen, potassium and the weed control ingredient contained in [on] every particle.

Advantages of **Insert Scotts Product Name:**

SMALL LIGHTWEIGHT GRANULES MEAN BETTER WEED CONTROL. Most lawn weed controls must be absorbed through the weed's leaves to be effective. Insert Product name granules are small and lightweight so they will stay on even the smallest weed leaves. And each insert product name granule contains weed control and America's favorite lawn fertilizer.

SCOTTS TRIONIZED® II FORMULA PROVIDES A MORE EFFICIENT NITROGEN THAN EVER BEFORE to help promote quicker greening.

THE NITROGEN IN INSERT PRODUCT NAME IS TIME-RELEASED to provide a supply of this essential nutrient to help your lawn stay thick and green for up to 6 to 8 weeks.

EACH INSERT PRODUCT NAME GRANULE CONTAINS NPK [NK]AND WEED CONTROL. We bond

Note to PM:

Bold, italicized text is information for the reader and is not part of the label.

[Bracketed information is optional.] Text separated by / denotes and/or options.

Highlighted text is new. Strike-through text is being deleted

Scotts® unique controlled-release nitrogen (N) [with phosphorous (P)] and potassium (K) and a weed control, so your lawn receives a uniform feeding, and effective weed control.

[ILLUS.] Scotts Insert Product Name
EVERY GRANULE CONTAINS NPK [NK]
AND WEED CONTROL

Provides uniform greening with effective weed control.

Insert Product name particles deliver the same ratio of nitrogen, phosphorus, potassium and weed control to every square inch of turf for even, consistent feeding plus better weed control.

How Weed Control Works

Small, lightweight granules mean better weed control. Most lawn weed controls must be absorbed through the weed's leaves to be effective. The weed control in this product consists of granules that are small and lightweight, so they will stay on even the smallest weed leaves. The weed control in Insert Product Name is absorbed by weed leaves (the weed's leaves), killing the plant.

Other Great Turf Builder® Products for Your Lawn:

To prevent crabgrass, use Turf Builder® Plus Halts®. No one else has a tougher crabgrass preventer. This problem solver forms a protective barrier to stop ugly crabgrass before it starts.

These great Turf Builder® products are developed specially by Scotts for the unique needs of your lawn - your satisfaction is unconditionally guaranteed.
