

rat and mouse bait station

Sears

CONTAINS "Fumarin"*

CAUTION: Keep Out of Reach of Children

NET WT.
4 OZ.

See other cautions on side of box.
Punch here and tear out perforations. Place in locations frequented by rats. See directions on side of box for mice.

GENERAL DIRECTIONS FOR MICE —
Place Bait in locations where mice feed, water, or travel. Bait placements along walls, in corners, and in concealed locations where mice can feed unobserved are desirable. Place tablespoon amounts of Bait at 8 to 12-foot intervals. An uninterrupted supply of Bait should be maintained for at least 15 days. Treated Bait should be placed in locations not accessible to children, pets, wildlife, and domestic animals or in tamper-proof bait boxes. Contaminated or spoiled Bait should be replaced promptly. Baiting should be continued until all signs of feeding have stopped.

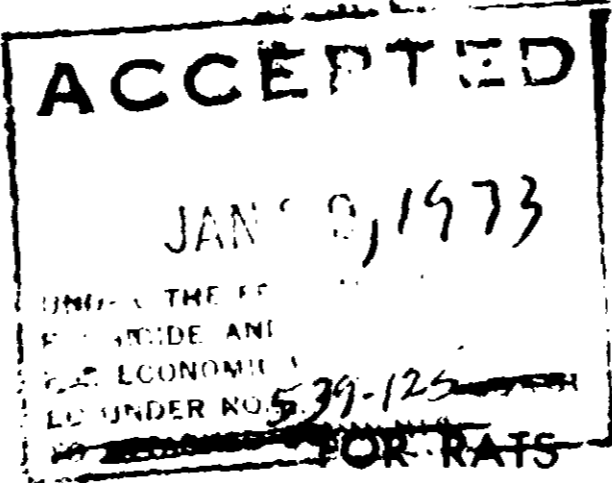

E.P.A. REG. NO. 539-125

ACTIVE INGREDIENT:
*3-(Alpha-Acetylfurfuryl)-4-Hydroxycoumarin 0.025%

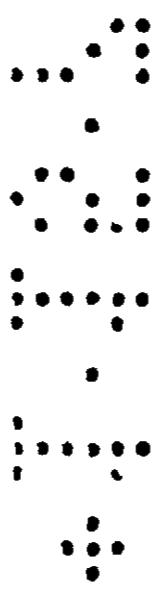

INERT INGREDIENTS 99.975%

TOTAL 100.000%

This package contains only enough poison to control 1 or 2 rats and a few mice.

Break perforations and remove plugs. Place the four bait boxes in locations frequented by rats, but protected from children, pets, livestock and wildlife. Replace bait boxes when empty. Keep bait out for at least 2 weeks.

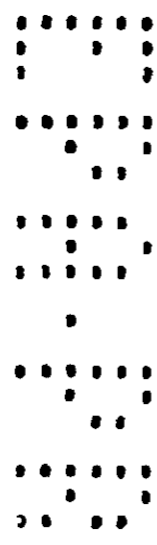

Conditions of use are beyond seller's control. Seller's liability is limited to products replacement or purchase price refund. Seller makes no warranty, express or implied, concerning products use beyond claims on carton.

SEARS Rat and Mouse Bait kills slowly and rodents must eat small quantities over a period of 5 to 15 days. Examine the bait boxes daily and promptly replace empty boxes with full ones until lack of feeding is noted.

Ready to use

E.P.A. REG. NO. 539-125

DIRECTIONS FOR USE — This package contains four bait boxes filled with SEARS RAT and MOUSE BAIT.

Break perforations and remove plugs. Place the four bait boxes in locations frequented by rats or mice, but protected from children, pets, livestock and wildlife. Leave baits in place for two weeks or as long as evidence of feeding is observed. If most of bait is eaten at one or more of the boxes, it indicates sufficient infestation to require more SEARS RAT and MOUSE BAIT. Replace empty boxes. For mouse control, place tablespoon amounts of Bait at 8 to 12 foot intervals. This method is simple, clean, effective.

Caution: SEARS RAT and MOUSE BAIT contains as its active ingredient an anti-coagulant chemical which, if taken by humans, domestic animals, wildlife or pets, may reduce the clotting ability of the blood and serious hemorrhage may result.

Note to Physicians: If swallowed by humans, domestic animals, or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such case, intravenous and oral administration of Vitamin K combined with blood transfusions may be indicated, as in the case of hemorrhage caused by overdoses of bishydroxycoumarin.
