WINTER LAWN FOOD

5-3-8

Covers 5,000 Sq. Ft.

Controls moss formation

Stops winter yellowing

ACTIVE INGREDIENTS:

Ferrous Sulphate (Monohydrate  $Fe SO_4 \cdot H_2O$ ) . . . . . 24.38%

INERT INGREDIENTS: (Relative to Herbicidal Content) . . . . . 75.62%

100.00%

CAUTION:

Keep out of reach of children. See back Panel for additional caution statements

WINTER LAWN FOOD

5-5-8

Covers 5,000 Sq. Ft.

GENERAL DIRECTIONS

SEARS WINTER LAWN FOOD encourages slow even growth by providing slowly available plant foods. This prevents winter yellowing due to the effects of cold weather on tender grass.

SEARS WINTER LAWN FOOD controls moss and greens up lawns by enriching the soil with Iron, Nitrogen, Phosphoric Acid and Potash.

NEW LAWNS: Mix well into the seed bed. Apply 40 lbs. per 4000 square feet. This will supply needed nutrients for fall planted lawns.

ESTABLISHED LAWNS: Apply during fall after September 1st. Apply 40 lbs. per 5000 square feet. This will take lawns through the winter season in a healthy condition with good color and without excessive growth.

SHRUBS: This fertilizer is recommended for all shrubs except those requiring acid soil conditions such as rhododendrons, camellias and azaleas. Especially recommended for roses, lilacs and bulbs. Broadcast on soil at the rate of 1 lb. per 100 square feet.

CAUTION:

This material may stain cement, stone or paint. Flush with water immediately after exposure. Water well after fertilizing. Store in a dry place.

GUARANTEED FERTILIZER ANALYSIS

Total Nitrogen (N) . . . . .	5.0%
4.0% Ammoniacal Nitrogen (Derived from Ammonium Phosphate)	
1.0% Organic Nitrogen (Water Insoluble Nitrogen Derived from Bone Meal and Sterilized Organic Materials)	
Available Phosphoric Acid (P <sub>2</sub> O <sub>5</sub> ) . . . . .	4.5%
(Derived from Ammonium Phosphate, Bone Meal and Sterilized Organic Materials)	
Soluble Potash (K <sub>2</sub> O) . . . . .	3.4%
ALSO CONTAINS	
Sulfur (S) . . . . .	2.1%
(Derived from Ferrous Sulphate and Ammonium Sulphate)	
Iron (Fe) . . . . .	1.0%
(Derived from Ferrous Sulphate)	

Potential Acidity: 1.1 lb. Calcium Carbonate Equivalent per 100 lbs.
