# SPEEDKIL

INDOOR SPACE AND SURFACE SPRAY  
Contains both DDVP and Synergized Pyrethrins

ODORLESS

Knocks down and kills certain flying and crawling insects including both resistant and non-resistant varieties.

ACTIVE INGREDIENTS	100%
Petroleum Distillate	
2,2-dichlorovinyl dimethyl phosphate and related compounds (DDVP)	
N-octyl bicycloheptene dicarboximide	
Technical Piperonyl butoxide—consists of (butylcarbityl) (6-propylpiperonyl) ether and related compounds	
Pyrethrins	

## DIRECTIONS

IN HOUSEHOLDS, RESTAURANTS, THEATERS, FOOD PROCESSING PLANTS, INDUSTRIAL PLANTS AND WAREHOUSES

### USE AS A SPACE SPRAY

TO CONTROL FLIES, MOSQUITOES, WASPS, HORNETS, GNATS, FLYING MOTHS, SMALL FLYING INSECTS: Spray upwards into four corners of room—10 to 15 seconds for 1,000 cu. ft. of room space. An average size room would require 15 to 20 seconds of spraying. Close windows for about 15 minutes after treatment. To control wasps and hornets on nest, spray nest directly at night.

A thorough misting around patio, barbecue, picnic tables, and other outdoor spaces when this mist is still wet will repel and kill annoying flying insects. Repeat as necessary. Use in food processing plants only when plant is not in operation. All food processing surfaces should be covered or thoroughly cleaned before using. Food should be removed or protected during treatments.

TO CONTROL ROACHES, ANTS, TICKS, SILVERFISH, SPIDERS, CENTIPEDES, MILLIPEDES: Spray cracks of window walls, floors, around doors and window frames, baseboards, behind and along storage areas, and other places these insects may congregate. Walk with spray nozzle along ground doors and window sills.

TO CONTROL BEES AND TICKS: Spray animal sleeping quarters freely—force insecticide into cracks, crevices, and about the room. Spray animal bedding. Repeat as necessary. DO NOT SPRAY ON ANIMALS.

TO CONTROL BEDBUGS: Take bed apart and spray entire surface of bedspreads, slats, and springs. Spray in cracks, joints in bedstead and on tufts and seams of mattress. Spray on and under baseboards, moldings, cracks, and crevices. Spray underneath loose wallpaper and other places these insects may hide. Allow treated areas to become completely dry, at least 4 hours before re-use.

### USE AS SURFACE SPRAY

TO CONTROL MOSQUITOES, WASPS, GNATS, FLYING MOTHS, COCK ROACHES, SILVERFISH: Apply as a coarse wet spray with low pressure sprayer. Do not spray on animals. Treat infested areas around baseboards, cracks, crevices, and other places these insects may infest. Treat infested areas of floors. Do not apply to areas which will be painted or polished. Do not allow them in treated areas until surfaces are completely dry. Do not use on plants, flowers, or in swimming pools. Do not treat

**CAUTION** Keep out of reach of children.

HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH THE SKIN. Wash thoroughly with water after handling and before eating or smoking. Do not use in areas where food is prepared or stored. Wash hands immediately and get medical attention if necessary.
