

## DIRECTIONS

FOR CLEANING, DISINFECTING AND DEODORIZING IN ONE OPERATION: On environmental surfaces, apply solution containing 1 part of GALAHAD to 128 parts of water, that is, about 1 ounce per gallon or 2½ ounces per 2½ gallon bucket. Scrub with brush, mop or damp cloth and allow solution to remain on surface for several minutes. Remove with damp mop or squeegee. Rinse with clear water, if desired, except where residual bacteriostatic activity is desired.

GALAHAD is a unique combination of specialized modern synthetic organic detergents and several highly potent substituted phenols. When used as directed, GALAHAD deposits a bacteriostatic film which inhibits the growth and multiplication of most pathogenic organisms.

GALAHAD passes A.O.A.C. Use Dilution Confirmation Tests against Staphylococcus aureus, Salmonella choleraesuis, and Pseudomonas aeruginosa at 1 to 128 dilution and, therefore, is acceptable for many applications in the hospital sanitation program including use in wash rooms and locker rooms.

### NEUTRAL DETERGENT-GERMICIDE • HOSPITAL GRADE A.O.A.C. Use Dilution: 1 to 128

BACTERICIDAL • STAPHICIDAL • FUNGICIDAL • PSEUDOMONACIDAL  
VIRUCIDAL • TUBERCULOCIDAL • CONDUCTIVE

Cleans, disinfects and deodorizes in one operation. Non-selective. Kills a wide variety of both Gram Positive and Gram Negative organisms. Kills most common pathogenic bacteria and fungi, including anti-biotic resistant Staph, virulent Pseudomonas aeruginosa, and virulent Mycobacterium tuberculosis. Deposits residual anti-microbial film that inhibits the growth of bacteria. \*Inactivates Influenza Virus A2 (Hong Kong) on inanimate environmental surfaces.

NEUTRAL • NO EXCESSIVE FOAMING • FREE RINSING  
WILL NOT REDUCE CONDUCTIVITY OF OPERATING ROOM FLOORS

Active Ingredients:	39.5%
Isopropanol	22.0%
Para-tertiary-amyphenol	5.0%
Ortho-phenylphenol	5.0%
Triethanolamine dodecyl benzene sulfonate	4.5%
Tetrasodium ethylene diamine tetraacetate	3.0%
Inert Ingredients	60.5%

Use on most environmental surfaces including floors, walls, cabinets, fixtures in hospitals, sanatoriums, sick rooms, operating rooms, contagious disease areas, wash rooms, schools, office buildings, restaurants, factories and institutions.

**WARNING: Keep Out of Reach of Children**  
First aid and other precautions on right panel.

DIRECTIONS: Continued from other side panel. GALAHAD passes the official A.O.A.C. Fungicidal Test at a dilution of 1 to 128 for disinfection of inanimate surfaces contaminated with pathogenic fungi.

GALAHAD passes the most recently adopted (Eleventh Edition, 1970, Chapter 4) A.O.A.C. test procedure against virulent Mycobacterium tuberculosis, at 1 to 128, after incubation for 12 weeks—in three different media.

Laboratory tests show that GALAHAD disinfects against Neisseria meningitis and Neisseria gonorrhoea on environmental surfaces.

**WARNING:** Harmful if swallowed. Keep out of reach of children. Disinfectant may cause skin irritation. Avoid contact of material with skin. May cause severe eye irritation. Avoid splashing in eyes. **Do not use, pour, spill or store near heat or open flame.**

**FIRST AID:** In case of contact with skin flush with plenty of water; for eyes, flush thoroughly with plenty of water, get medical attention. If swallowed, give raw egg white, milk, mucilage or cornstarch paste and follow with emetic of mustard. Call a physician.

Rinse empty container thoroughly with water and discard it.
