

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

FOR CLEANING, DISINFECTING AND DEODORIZING IN ONE OPERATION: On environmental surfaces, apply solution containing one ounce GALAHAD to 1 gallon of water. Scrub with brush, mop or damp cloth and allow solution to remain on the surface for several minutes. Remove with damp mop or squeegee. Rinse with clear water, if desired, except where residual bacteriostatic activity is desired.

GALAHAD is a unique combination of specialized modern synthetic organic detergents and several highly potent substituted phenols. When used as directed, GALAHAD deposits a bacteriostatic film which inhibits the growth and multiplication of most pathogenic organisms.

GALAHAD passes A.O.A.C. Use Dilution Confirmation tests against Staph. aureus, Salmonella choleraesuis and Pseudomonas aeruginosa at 1 to 128 dilution and, therefore, is acceptable for many applications in the hospital sanitation program including use in wash rooms and locker rooms.

GALAHAD passes the A.O.A.C. Fungicidal test at a dilution of 1 to 128 for disinfection of inanimate surfaces contaminated with pathogenic fungi.

GALAHAD passes the A.O.A.C. test procedure against virulent Mycobacterium tuberculosis at a dilution of 1 to 128, after incubation for 12 weeks-- in three different media. Laboratory tests show that GALAHAD disinfects against Neisseria meningitis and Neisseria gonorrhoea on environmental surfaces.

NOT FOR RESALE: Formulated for Industrial, Commercial and Institutional Use ONLY.

GALAHAD®

NEUTRAL DETERGENT-GERMICIDE

A.O.A.C. Use Dilution: 1 to 128

**BACTERICIDAL • STAPHICIDAL • FUNGICIDAL • PSEUDOMONACIDAL
VIRUCIDAL • TUBERCULOCIDAL • CONDUCTIVE**

Cleans, disinfects and deodorizes in one operation. Non-selective. Kills a wide variety of both Gram Positive and Gram Negative organisms. Kills most common pathogenic bacteria and fungi, including anti-biotic resistant Staph, virulent Pseudomonas aeruginosa, and virulent Mycobacterium tuberculosis. Deposits residual anti-microbial film that inhibits the growth of bacteria. Inactivates Influenza Virus A2 (Hong Kong) on inanimate environmental surfaces.

**NEUTRAL • NO EXCESSIVE FOAMING • FREE RINSING
WILL NOT REDUCE CONDUCTIVITY OF OPERATING ROOM FLOORS**

Active Ingredients:

p-tert-Amylphenol.....5.00 %
o-Phenylphenol.....5.00 %

Inert Ingredients.....90.00 %

Use on most environmental surfaces including floors, walls, cabinets, fixtures in hospitals, sanatoriums, sick rooms, operating rooms, contagious disease areas, wash rooms, schools, office buildings, restaurants, factories and institutions.

WARNING: Keep Out of Reach of Children
First aid and other precautions on right panel.

Precautionary Statements

Hazards to Humans and Domestic Animals

Warning: Do not get in eyes. Disinfectant may cause skin irritation. May cause severe eye irritation.

FIRST AID: In case of contact with skin, flush with plenty of water; for eyes, remove contact lens if worn, and flush thoroughly with plenty of water, get medical attention. If swallowed, drink large quantities of water. Call a physician.

STORAGE AND DISPOSAL

- DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.
 - DO NOT STORE ON SIDE.
 - AVOID CREASING OR IMPACTING OF SIDE WALLS.
- Pesticide Disposal**—Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray or mixture of rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

CONTAINER DISPOSAL—Triple rinse (or equivalent). Then offer for recycling, reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

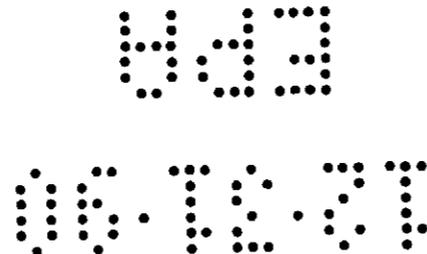

AVOID CONTACT OF GALAHAD WITH SKIN. CAN CAUSE DEPIGMENTATION OR DISCOLORING OF SKIN.

Do not use, pour, spill or store Galahad near heat or open flame.
