

# CARPET-FOAM

## DRY FOAM CARPET SHAMPOO

### ANTI-BACTERIAL — CONTAINS BIODEGRADABLE DETERGENTS

For "deep-down" cleaning. Removes practically all kinds of soils and stains from carpets, rugs, upholstery. Combines dry cleaning with wet cleaning. Removes greases and other oily soils; lint, grit, dust and other dry soils; and all water-soluble soils.

May be used on all fibers including synthetics such as acrylic, nylon, polyester, rayon, etc., as well as cotton and wool. May be used on all fast colors. Dries rapidly and completely. No fumes. No lingering odors. No sticky or tacky residues. No wetting of carpet backing when used as directed. Odorless.

Clear, stable formula. Dilutes clear, too. Non-flammable. All-synthetic. Contains no soap. Equally effective in hard and soft waters. Neutral. Brightens and rejuvenates colors. Produces thick, stable suds.

Cleans, sanitizes and deodorizes in one operation. Residual anti-bacterial activity continues to inhibit growth of germs in carpets for weeks. Especially designed for use in carpet shampoo machines such as the Puritan CarpeTron and the Gyro-Matic.

Active Ingredients: Sodium Lauryl Sulfate ..... 5.70%  
o-Benzyl-p-chlorophenol ..... 0.60%

Inert Ingredients: \* ..... 93.70%

\*Includes synthetic organic detergents and other cleaning and brightening components.

**CAUTION:** Keep out of reach of children.

### DIRECTIONS

#### FOR USE WITH DRY FOAM MACHINE

1. Vacuum thoroughly with Puritan's CarpeTwin to remove loose soil.
2. Remove any spots or stains with Puritan's BOUNTY.
3. Mix 1 part of CARPET-FOAM with 12 parts of warm water. In CarpeTron tank, which holds 3½ gallons, add 2 pints of CARPET-FOAM to 3 gallons of warm water.
4. Following instructions given with the machine, generate the foam and shampoo the carpets and rugs with the foam only. No liquid reaches the shampoo brush and no wetting of the carpet occurs.
5. After shampooing, allow carpet to dry for about 30 minutes, then vacuum thoroughly with Puritan CarpeTwin or similar machine.

#### FOR USE WITH SINGLE DISC FLOOR MACHINES

1. Vacuum thoroughly to remove loose soil.

2. Mix 1 part of CARPET-FOAM with 12 parts of warm water.
3. Use only as much solution as required to generate foam. Do not soak carpet.
4. Shampoo surface with dry foam.
5. Before carpet dries, lay pile in one direction with carpet pile brush.
6. Avoid walking on carpet until dry.
7. When dry, vacuum thoroughly.

#### FOR UPHOLSTERY

1. Vacuum thoroughly or brush away loose soil.
2. Mix 1 part of CARPET-FOAM with 12 parts of warm water in small container.
3. Agitate solution vigorously to generate foam.
4. Saturate sponge or cloth with foam.
5. Apply foam—not solution—to upholstery and remove soil.
6. Allow to dry thoroughly, then vacuum or brush surface gently.

CARPET FOAM is bacteriostatic when tested against E. Coli and Staph Aureus by Agar Cup Plate and Tube Dilution methods. When used as directed, it provides a clean carpet with residual bacteriostatic activity.

Rinse empty container thoroughly with water and discard it.
