

[541-176]-2 pages PURITAN STAR-FOG

Odorless Indoor Space and Surface Spray

For Food Handlers

Contains Synergized Pyrethrins

Kills Flies, Mosquitoes, Gnats, Roaches, Waterbugs, Silverfish, Crickets, Spiders, exposed stages of Grain Weevils, Grain Moths, Flour Beetles, Grain Mites, Ants, Fleas, Brown Dog Ticks, Bedbugs and Carpet Beetles.

Especially designed for use in edible areas of Federally Inspected Meat and Poultry Processing Plants, Dairies, Bottlers, Breweries, Restaurants, Kitchens, Canneries, Granaries, Tobacco Warehouses, Bakeries, Supermarkets, etc.

Active Ingredients: 100%

Petroleum distillate; N-octyl bicycloheptene dicarboximide; Technical Piperonyl butoxide\*; Pyrethrins.

Consists of (butylcarbityl) (6-propylpiperonyl) ether and related compounds.

#### DIRECTIONS

**AS A SPACE SPRAY FOR FLYING INSECTS:** For flies, mosquitoes and gnats. Use 2 ounces as a finely divided floating spray or fog for each 1,000 cubic feet of space. For best results in large areas, disperse with an electric sprayer. Open all cupboards, closets and lockers. The mist should be sprayed so that it will be forced into crevices where the insects hide. Leave room closed for at least 10 minutes after spraying. Repeat application as often as necessary.

**AS A DIRECTIONAL SPRAY FOR CRAWLING INSECTS:** For roaches, waterbugs, silverfish, crickets and spiders. Use a coarse spray that will not float in the air. Direct the spray to infested surfaces of cupboards, lockers and other places where insects hide. Wet thoroughly shelving, baseboards, woodwork and areas around drain pipes to insure a heavy deposit. Work spray into cracks and other hiding places. Wherever possible spray insects directly. Insects hit by the spray will be killed immediately. Repeat when necessary.

**FOR ANTS:** Spray shelves, cabinets, storage areas and trails, nests, baseboards, window sills, door frames and other places of entry. Repeat when necessary.

**FOR FLEAS AND BROWN DOG TICKS IN BUILDINGS:** Spray lower wall portions, baseboards, rugs, carpets and floors of ~~infested~~ infested areas. Animal quarters, kennels and bedding should also be sprayed. Repeat when necessary.

**FOR GRAIN WEEVILS, GRAIN MOTHS, FLOUR BEETLES AND GRAIN MITES (Accessible Stages):** Wet surface thoroughly and treat all infested surface areas, insect hiding places and insect runways. Spray to point of run-off. Repeat when necessary.

**FOR BEDBUGS:** Spray beds and mattresses, including all tufts, seams and folds, springs and frame. Treat walls, woodwork, floors and hiding places. Air bedding before using. Repeat when necessary.

**FOR CARPET BEETLES:** Spray infested areas of carpets, local areas of floor, baseboards, cracks, and under carpets where insects may be found. Repeat when necessary.

Meets requirements of the "Meat Inspection Division Memorandum No. 52 -- Insect Spray"

**541-176**

CAUTION (18 pt.): Keep out of reach of children (12 pt.).

Harmful if swallowed. Although flash point of this product is over 140°F., certain precautions should be taken when spraying a dense fog indoors. All fires, flames, pilot lights or other direct sources of ignition should be shut off. Not more than one gallon of product should be used to treat 50,000 cubic feet of space, with proportional quantities for smaller or larger volumes. Do not smoke while spraying. Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

Do not re-use empty container. Wash thoroughly with water and detergent. Discard in a safe place.
