dling is contrary to label instructions

DIRECTIONS

Riley Bros. Back Rubber Liquid Insecticide is a premium quality product which comes to you as a liquid for immediate use in automatic cattle oilers. Do not dilute further with oil or kerosene.

Used continuously in automatic cattle oilers, this back rubber liquid insecticide brings about a rapid reduction of horn flies after exposure of animals. Regular exposure of animals to this material throughout the season will give good results against lice.

Caution: DO NOT USE ON DAIRY ANIMALS. For cows, horses, pigs, pets, and other livestock buy Riley Bros. Fly Killer Animal Spray with Tabutrex Repellent. Do not use on cattle within four weeks of slaughter. Do not permit calves less than 3 months of age access to back rubbers.

Avoid storage near feed and food products.

POISON

May be fatal if swallowed. Do not breathe vapors or get in eyes, on skin, or on clothing. Wash thoroughly after using. To protect wildlife and fish, do not contaminate streams, lakes or ponds with this material.

Do not use or store near heat or open flame.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
