Directions

Riley Bros. Back Rubber Oil is a premium quality product which comes to you as a liquid for immediate use in automatic cattle oilers. Do not dilute further with oil or kerosene.

Used continuously in automatic cattle oilers, this back rubber liquid insecticide brings about reduction of horn flies after exposure of animals. It is recommended that backrubbers be constructed or placed so that cattle can rub their faces on them in order to reduce face fly populations. Regular exposure of animals to this material throughout the season will give good results against lice.

Caution: DO NOT USE ON DAIRY ANIMALS. Do not use on cattle within four weeks of slaughter. Do not permit calves less than 3 months of age access to back rubbers. Avoid storage near feed and food products.

This product is toxic to fish. Do not contaminate water by cleaning of equipment, or disposal of wastes.

Caution:

May be fatal if swallowed. Avoid breathing vapors. Avoid contact with eyes, skin or clothing. Wash thoroughly after using.

Do not use or store near heat or open flame.
