VANWATERS' DRY CHLORINE GRANULAR

ACTIVE INGREDIENT: Calcium Hypochlorite* 65% (Calcium Hypochlorite)
 INERT INGREDIENTS: 35% EPA Reg. No. 550-52 -AA
 *Available chlorine 65%

DIRECTIONS FOR USE IN POOLS

VANWATERS' Dry Chlorine Granular when dissolved in pool water as directed will keep pool water clear, clean and sparkling. It will control growth of algae and effectively kill many bacteria which may be the cause of infections in pools.

INITIAL CHLORINATION: For initial chlorination of any pool water, add 1 ounce of Van Waters' Dry Chlorine Granular for each 1,000 gallons. Allow five minutes for the dry chlorine granular to disperse and then test the chlorine residual with a pool test kit and if below 0.6-1.0 ppm repeat this dosage until 0.6 to 1.0 ppm is obtained.

ROUTINE CHLORINATION DOSAGE: Subsequently add 3.4 oz. of Van Waters' Dry Chlorine Granular per 5,000 gallons daily or as often as needed to maintain 0.6 to 1.0 ppm whether the pool is in use or not. Use a test kit to determine chlorine residual. To apply approximately 1.0 ppm available chlorine, add 1 oz. of Van Waters' Chlorine Granular per 5,000 gallons of water. For best results, add Van Waters' Dry Chlorine as a solution (1 oz. in 2 qts. of water) to the pool water or scatter the granular material directly over the pool surface.

MAINTENANCE of pH: pH should be maintained in the 7.2-7.6 range. Maintaining 0.6-1.0 ppm (parts per million) chlorine residual and a 7.2-7.6 pH range will result in clean, sparkling water.

STABILIZED POOLS: For pools conditioned with cyanuric acid at concentrations up to 50 ppm, always maintain the chlorine residual at 1.0-1.5 ppm as determined by test kit. Add 1 oz. of Van Waters' Dry Chlorine Granular per 5,000 gallons of water daily or as often as needed to maintain 1.0-1.5 ppm chlorine residual.

Three level tablespoons of VANWATERS' Granular Dry Chlorine weigh about 1 oz. One standard measuring cupful of VANWATERS' Granular Dry Chlorine weighs about six ounces.

HOW TO DETERMINE POOL CAPACITY (in U. S. Gallons):

- (a) For RECTANGULAR OR SQUARE POOLS: Multiply feet length X feet width X feet depth (average X 7.5).
- (b) For CIRCULAR POOLS of various diameters, gallons per foot of depth are as follows:
- | | | | | | | | | |
|-----------------------|------|------|------|------|-----|-----|-----|-----|
| Diameter (feet) | 24' | 21' | 18' | 15' | 12' | 10' | 8' | 6' |
| Gal. per ft. of Depth | 3400 | 2600 | 1900 | 1320 | 850 | 590 | 375 | 210 |

DANGER! KEEP OUT OF REACH OF CHILDREN. MIX ONLY WITH WATER, MAY CAUSE FIRE IF CONTAMINATED.

Fatal or harmful if swallowed. May cause chemical burns. Do not allow contact with skin, mucous membranes, or clothing.

DANGER

This product is a powerful oxidant. Keep away from combustible organic material. Do not contaminate with any foreign matter. Contamination may result in fire and the fire will be of great intensity. Drench fire with water and cool the surrounding area with water. Prevent any burning material such as a lighted cigarette from falling into container. Dispose of spilled product by flushing with large amounts of water. When measuring use only a clean, dry cup. Any foreign matter on the cup may cause fire. A clean, dry container must always be used to carry this product to the pool. Do not mix with household products, acids, solvents or other pool chemicals. Keep in a cool, dry place in the original container. Rinse empty container with water. Dispose of wastes by flushing with large amounts of water. Always replace cover. Do not drop, roll or skid container. Keep upright.

ANTIDOTES: FIRST AID - CALL A PHYSICIAN IMMEDIATELY

- External - Flood with water for 15 minutes.
 Internal - Drink large quantities of water or milk. Follow with milk of magnesia, vegetable oil, or beaten eggs. Call Physician immediately.
 Eyes - Wash eyes with water for 15 minutes. Get prompt medical attention.

Do not re-use empty container. Discard clean empty container in a safe place.
 This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, or ponds.

WATERS' DRY CHLORINE GRANULAR

WATERS' DRY CHLORINE GRANULAR is a highly effective disinfectant and sanitizer. It is used for the treatment of drinking water, swimming pools, and industrial water systems. The granules are easy to handle and dissolve quickly in water. It is important to use the correct dosage and to wear protective clothing when handling this product. For more information, please refer to the technical manual or contact our technical support department.

CAUTION: This product is highly corrosive and can cause severe burns if it comes in contact with the skin or eyes. It should be stored in a cool, dry place away from children and pets. Do not inhale the dust or fumes. Always use proper ventilation when using this product.

DANGER! KEEP OUT OF REACH OF CHILDREN. MAY BE IRRITATING TO SKIN AND EYES. CONTAINS CHLORINE.
