

Apply only as specified on this label.

#### DIRECTIONS

This material is formulated for use by pest control operators in controlling household insect pests.

An insecticidal spray containing 1/2% Diazinon may be formulated by adding 1 1/4 fl. oz. of this concentrate to sufficient water to make one gallon. For a 1% Diazinon spray increase the amount of concentrate added to 2 1/2 fl. oz.

See PRODUCT BULLETIN (s) for additional uses.

**NOTE:** The solvent used in this formulation is a petroleum distillate which may stain certain plastic, rubber and asphalt materials - floor tiles and coverings. Do not treat such materials. Care should also be taken to avoid spotting of wallpaper and fabrics. When used in dwellings, care should be taken to avoid deposits which could be frequently contacted by children. Do not allow children in treated areas until surfaces are dry. Do not contaminate food, food containers or cooking utensils.

**Cockroaches (Waterbugs), Ants and Silverfish:** Make spot applications of 1/2% Diazinon as a coarse spray or apply with a paint brush to baseboards, areas around water pipes, cracks and crevices, surfaces behind and beneath cabinets, refrigerators, sinks, stoves and similar areas where these insects hide.

For heavy cockroach infestations, make the first application at a strength of 1% Diazinon, followed by monthly applications of 1/2% Diazinon.

**Carpet Beetles:** Apply a 1/2% Diazinon spray in spot applications along baseboards and edges of carpeting, under carpeting and rugs and furniture, in closets and on shelving, and wherever these insects are seen or suspected.

**Spiders and Scorpions:** Apply a 1/2% Diazinon spray around windows, doors, and along baseboards. Make spot applications to other areas over which these pests may crawl.

**Pantry Pests-exposed stages (Saw-Toothed Grain Beetle, Flour Beetle, Rice Weevil, Cigarette Beetle, Drugstore Beetle, Indian-Meal Moth):** Apply a 1/2% spray to shelves and cupboards where food containers suspected of being infested are stored. Remove all food and shelving paper before spraying. Do not replace the food packages until spray has dried. Cover shelves with shelving paper. This treatment is supplemental to good housekeeping, since it will have no effect on insects breeding within food packages. Infested food packages should be destroyed.

**Brown Dog Ticks in Buildings:** Make thorough application of a 1/2% Diazinon spray to infested areas around baseboards, window and door frames, wall cracks, sleeping quarters of household pets, and localized areas of floors and floor coverings. Fresh bedding should be placed in animal quarters following treatment. Do not treat animals with this formulation.

## DIRECTIONS FOR USE IN FOOD HANDLING ESTABLISHMENTS

(Places other than private residences in which exposed food is held, processed, prepared, or served.)

**APPLICATIONS WITHIN FOOD AREAS LIMITED TO CRACK AND CREVICE TREATMENT ONLY.** Includes receiving, serving, storage (dry, cold, frozen, raw), packaging (canning, bottling, wrapping, boxing), preparing (cleaning, slicing, cooking, grinding), edible waste storage, enclosed processing systems (milk, dairies, edible oils, syrups), and serving areas (when food is present or facility is in operation).

**Limited to Crack and Crevice Treatments Only.** Apply as a pinpoint spray a small amount of a ½ - 1% Diazinon spray (consult label for dilution directions) directly into cracks and crevices-expansion joints between different elements of construction or between equipment bases and the floor, wall voids or hollow equipment legs where Resistant and Nonresistant Cockroaches, Ants, Spiders and Silverfish may hide. (When necessary to treat electrical distribution facilities and equipment for effective control of the above insect pest, *treat only with Diazinon 4S in oil*. Do not use Diazinon 4E in water in these areas due to shock hazard. Prior to treatment de-energize circuits and do not re-energize until the material has thoroughly dried to minimize the danger of ignition of the material by sparks produced during operation of the equipment.) This material may also be used as an aid in controlling the following Pantry Pests which may come in contact with the material: Saw-tooth Grain Beetle, Confused Flour Beetle, Rice Weevil, Cigarette Beetle, Drugstore Beetle and Indian Meal Moth. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

**APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE NOT PERMITTED.**

**APPLICATION IN NON-FOOD AREAS LIMITED TO SPOT APPLICATION ONLY.** Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets, and storage (after canning or bottling), serving area (when no food is present and facility is not in operation).

Apply ½ - 1% Diazinon as a coarse spray or apply with a paint brush to baseboard areas, around water pipes, surfaces behind and beneath sinks, lockers, tables, pallets and similar areas where insects listed above may hide or through which they may enter.
