MINT-O-PHENE

BACTERICIDE
GERMICIDE DISINFECTANT
DEODORANT

PLEASING MINT ODOR

Phenol Coefficient 5 F.D.A. Method

Active Ingredients:

Isopropyl Alcohol
Vegetable Oil Soap
o - Benzyl - p - chlorophenol
Essential Oils

Inert Ingredients:

Water, not over 55.0%
Vegetable Dye

Directions - as a Disinfectant

This disinfectant should always be diluted with water before using as the use of concentrated disinfectant may cause irritation to the skin. Be sure all dirt is swept up and removed before applying disinfectant, and make sure disinfectant solution comes in contact with all infected areas.

To disinfect floors, cellars, basements, toilet rooms, bathrooms, lavatories, urinals, sinks, etc., clean thoroughly: Use 2½ ozs. of this preparation to every gallon of water; mop in regular manner. If it is impractical to mop, spray with 4 ozs. per gallon of water.

As a Germicide and Prophylactic for Use in Controlling the Spread of Athlete's Foot Fungi

As a prophylactic agent to aid in preventing transmission of Athlete's Foot Fungi in locker rooms, swimming pools, etc., dilute by dissolving (2) two ounces in one gallon of water to scrub shower room floors, bath mats, runways and other surfaces contacted by the bare feet.

CAUTION

Keep out of reach of children.

Always dilute as directed before using.

May cause skin or eye irritation.

HARMFUL IF SWALLOWED
