DIRECTIONS FOR USE

For San Jose scale and European red mite use a 2% solution (2 gallons Superior Oil to 98 gallons of water). For more resistant species, including fruit tree leaf roller, apple red bug, cottony peach scale and scurfy scale use a 3% solution (3 gallons Superior Oil to 97 gallons of water).

Start filling spray tank with water, with agitator running, add required amount of Baird's Superior Oil. Keep agitated while spraying. To avoid over-spraying the entire tree should be sprayed in one operation.
