

**MIXING AND USING INSTRUCTIONS**

DURSBAN 4E insecticide mixes readily with water or oil. Dilute the required amount of DURSBAN 4E in water or in a base oil such as deodorized kerosene or No. 2 Fuel Oil. Mix according to the following table to obtain the desired concentration of 0.25% or 0.50% DURSBAN insecticide. Use the higher concentration (0.50%) to quickly reduce heavy cockroach infestations and the lower concentration (0.25%) on light infestations. This product is intended for homes, hospitals, schools and other institutional buildings and warehouses.

Amount of Spray Mixture Desired	Amount of Dursban 4E to Use	
	for 0.25% spray	for 0.50% spray
1 gallon	4 teaspoonfuls	8 teaspoonfuls
3 gallons	4 tablespoonfuls	8 tablespoonfuls
5 gallons	3 fluid ounces	6 fluid ounces
10 gallons	6 fluid ounces	12 fluid ounces

Use as a spot treatment by applying as a coarse spray or with a paint brush, to areas where cockroaches normally are found. These areas include dark corners of rooms and closets, at the base of walls, in cracks in the wall, behind baseboards, behind and beneath sinks, refrigerators, stoves and cabinets and around drainpipes. Apply in a manner to avoid spray or mist contacting food, feedstuff and water supplies. Dishes and food handling utensils should be thoroughly washed in soap and water if they have become contaminated by the application of this product. Repeat treatment as needed.

NOTE: A period of 4 to 7 days after treatment is normally required for maximum effect on cockroaches.
