**DIRECTIONS**

**GENERAL WEED CONTROL**

For use on bare ground to prevent weed growth and for weed control in enclosed industrial areas such as Tank Farms, Lumber Storage Yards, and Substations. Also for treating areas to be covered by paving for weed prevention.

**TIMING:** When weeds are present, for best results apply when weeds are less than 6 inches high. For treatment of bare ground apply at any time the ground is not frozen.

**APPLICATION:** Mix the recommended amount with water and apply with sprayer or sprinkling can.

**FOR BARE GROUND AND ENCLOSED AREAS:** For use in sprayer mix one gallon of this product in 25 gallons of water. Do Not use more than 1.75 gallons of this mixture per acre. For use in sprinkling cans mix a cup of this product in 10 gallons of water. Do Not use more than this amount per 110 square feet.

**FOR AREAS TO BE COVERED BY PAVEMENT:** Use 1.75 to 3.5 gallons per 100 square yards applied just before the pavement is to be applied. Use the amount of water needed to give proper distribution with the equipment available. Apply at the rate only to areas to be paved.
