

## GENERAL DIRECTIONS

Baird's N-D Herbicide is a selective herbicide combination for the control of the following annual grasses and broadleaf weeds:

**ANNUAL GRASSES:** Crabgrass, Barnyardgrass, Goosegrass, Stinkgrass, Yellow foxtail, Wild radish, Cupress, and Johnsongrass (from seed)

**BROADLEAF WEEDS:** Field bindweed, Black nightshade, Pigweed, Redroot pigweed, Green foxtail, Green amaranth, Lambsquarters, Mustard, Shepherd's Purse, Ragweed, Quackgrass, Carpetweed, Mercurialis, Beggarweed (Beard Lice) and Field bindweed.

**DO NOT USE BAIRD'S N-D HERBICIDE ON SILT LOAM SOILS OF EXTREMELY FINE TEXTURE**

**PREPARATION OF SOIL:** The area to be treated should be well prepared and as free as possible from stubble and litter. If the land has been plowed, the soil clods should be broken up by harrow or roller wheel. Plant on a flat or slightly raised bed. If weather factors make replanting necessary after Baird's N-D Herbicide has been applied, thoroughly disk the area prior to replanting.

**METHOD OF APPLICATION:** Thorough and uniform coverage of the soil surface is essential for good weed control. Apply Baird's N-D Herbicide as a spray at planting time, using either a planter-mounted sprayer or a separate sprayer after the planting operation. The chemical may be applied up to the time of crop emergence or "cracking time" on peanuts but before the crop plants emerge on soybeans.

### DIRECTIONS FOR USE

Put one-half the recommended amount of water in the spray tank, add the required amount of Baird's N-D Herbicide, then add the remainder of the water to the tank while mixing. Stir or use by agitation until completely mixed. It is essential that the sprayer be calibrated accurately prior to use on crop.

**SOYBEANS:** Use Baird's N-D Herbicide as a small spray through the planter application just after the soybeans are planted but before the soybeans emerge from the soil.

**RECOMMENDED DOSAGE RATE FOR SOYBEANS:** Use Baird's N-D Herbicide at the rate of 2.0 quarts per acre in 40 gallons of water per acre as an overall spray or at 1.0 qt per acre. Treatment may be applied over the entire area to be treated.

Amount of Baird's N-D Herbicide Per Acre to Use for Band Treatment of Soybeans

Width of Band	Row Spacing	Amount of Herbicide per Acre
12"	30" to 42"	2.0 quarts
14"	30" to 42"	1.8 quarts
12"	42" to 48"	1.8 quarts
14"	42" to 48"	1.6 quarts
12"	48" to 60"	1.6 quarts
14"	48" to 60"	1.4 quarts

Use 12-20 gallons of water per acre for each band.

**NOTE 1:** Do not apply this herbicide to soybeans that are less than 2 inches tall. Do not apply this herbicide to soybeans that are less than 2 inches tall.

**NOTE 2:** Do not apply this herbicide to soybeans that are less than 2 inches tall.

**NOTE 3:** Do not apply this herbicide to soybeans that are less than 2 inches tall.

# BAIRD'S N-D HERBICIDE

Controls Seeding Grasses and Weeds in Soybeans and Peanuts

### ACTIVE INGREDIENTS

Sodium N-1 Naphthylphthalamic acid 22.3%  
Sodium salt of difloseb<sup>\*\*\*</sup>  
(2 sec-butyl 4,6 dinitrophenol) 11.5%

**INERT INGREDIENTS** 66.2%

**Total** 100.0%

\* Equivalent to 20.8% N-1 naphthylphthalamic acid

\*\* Equivalent to 10.5% 4,6-Dinitro-2 sec-butylphenol

Each gallon contains two pounds of active NPA and one pound of Active DNB<sup>™</sup>

**DANGER  
POISON**

KEEP OUT OF REACH OF CHILDREN AND FARM ANIMALS

May be fatal if swallowed or absorbed through skin.

Caution: Irritant to skin or on clothing.

Wash contaminated clothing.

Avoid the spray mist.

Do not breathe externally.

May irritate the heat and burn areas.

Do not use near children or farm animals.

**SYMPTOMS OF POISONING:** Irritation to the eyes, nose, throat and lungs. If symptoms develop, flush with water. If inhaled, get fresh air. If swallowed, do not induce vomiting. Seek medical attention.

**FIRST AID:** If swallowed, give water if available. If in eyes, flush with cold water. If on skin, wash with soap and water. If on clothing, immediately flush with plenty of water for at least fifteen minutes and get medical attention. If sprayed on face, immediately remove contaminated clothing, INCLUDING SHOES, and wash with soap and plenty of water. If symptoms of poisoning develop, seek a physician and treat as per FIRST AID above. Discard contaminated clothing and shoes or clean them thoroughly before reuse. Staining may result if contact with articles are allowed to contact carpets, upholstery, etc.

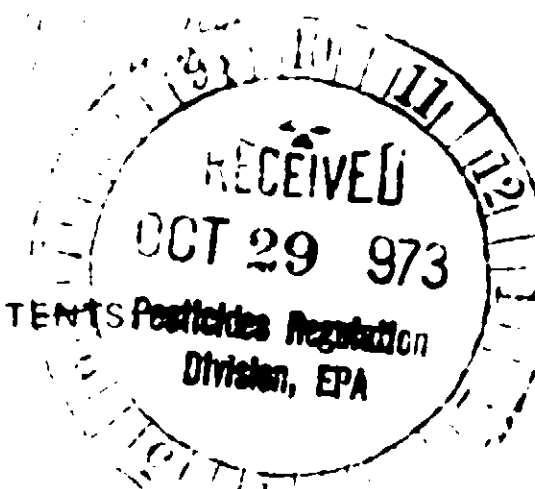

**ANTIDOTE:** None known. Treat as per FIRST AID above. Do not induce vomiting.

*This product is a restricted use pesticide. It is not to be used by anyone other than a licensed applicator. Do not apply to water. Do not use near children or farm animals. Apply this herbicide as specified on this label.*

Division, EPA

**NOTE 4:** Baird's N-D Herbicide best results are obtained when mixture

**NOTE 5:** May be used in the incorporated herbicide

**NOTE 6:** Do not use on land to be planted

**PEANUTS:** Do not use on land to be planted

This is normally from 5 to 7 days made from planting time up to the cracking stage

**RECOMMENDED DOSAGE RATE** at the rate of 6 quarts in 20 to 25 (broadcast application). Treatment desired. The soil should not be disturbed if treatment is used
