PRODUCT INFORMATION

AGSCO DB-GREEN-A is a special seed treatment formulation of Lindane, Dieldrin and hexachloro benzene which, when used in accordance with directions for use, protects crops against seed-borne diseases such as downy mildew of wheat, bar smut, covered and false loose smut of barley, and barren of rye. It also gives temporary protection to cereal crops, corn and soybeans against certain soil-borne diseases such as root rot, seedling blight and for temporary protection of seeds and seedlings against wireworms.

AGSCO DB-GREEN-A is especially designed for on-the-farm application as a Drill Box Treatment.

DIRECTIONS FOR USE

WHEAT, BARLEY, OATS, RYE -- Use rate of 2 oz. per bushel.

FLAX -- Use rate of 4 oz. per bushel.

CORN AND SOYBEANS -- Use rate of 2 3/4 oz. per bushel.

MIX AGSCO DB-GREEN-A THOROUGHLY into the seed until uniformly applied by: (1) use an AGSCO Automatic Seed Treater that meters in the proper amount of AGSCO DB-GREEN-A and uniformly mixes it as clean untreated seed is augered from the grain box into the planter or drill box as uniformly treated seed.

(2) After the required amount of DB-GREEN-A has been added to the seed, mix thoroughly with a paddle. If the seed is to be sown in a drill, mix in the drill box. If the seed is to be sown in a broadcast manner, mix in a large container. The seed should be well mixed and mix again until all seedling has been treated and coloring of seed appears uniform. DO NOT MIX WITH HANDS.

(3) Dribble the required amount of DB-GREEN-A into each bushel of seed as it is poured into the drill box and mix with a paddle until uniform.
