GENERAL INFORMATION

AGSCO DB-GREEN L is a special seed treatment formulation of maneb and lindane, which when used at the correct dosage rates, protects crops against seed-borne disease such as stinking smut (bunt) of wheat, oat smuts, covered and false loose smuts of barley and bunt of rye. It also protects cereal crops against certain seed and soil-borne diseases such as seedling blight (phase of root rot) caused from black-pointed seed or scabby seed and for temporary protection of seeds and seedlings against wireworms. AGSCO DB-GREEN L is especially designed for on-the-farm treatment using a seed treater suitable for metering and mixing flowable seed treatments.

This product may only be used as a commercial or on-farm seed treatment for barley, wheat, corn, oats, and rye.

APPLICATION RATE

Seed	Dosage Rate/Bushel
Corn	4 fl. oz.
Barley	2.3 fl. oz.
Oats	1.5 fl. oz.
Rye	2.9 fl. oz.
Wheat	2.9 fl. oz.

Use only the recommended rate. Lower amounts may not give the desired control. Higher amounts may cause seed injury.

Uneven treating of seed may cause over-treatment on some seed kernels and under-treatment on other seed kernels. Seed should be well cured, dry and cleaned before treatment. For maximum benefits, avoid deep-seeding and exceptionally early sowing under poor growing conditions.

Labels attached to the treated seed must read:

"Persons handling treated seed must wear long-sleeved shirt and long pants plus chemical-resistant gloves made out of any waterproof materials. Treated seed must not be used or mixed with food or animal feed or processed for oil. Exposed treated seeds maybe hazardous to birds and other wildlife. Dispose of all excess treated seed and packaging by burial away from bodies of water.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

Exception: If the product is soil-injected or soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area without restriction if there will be no contact with anything that has been treated."

USE RESTRICTIONS

Plantback restrictions: Leafy vegetables.....30 days
All other unregistered crops.....12 months

Treat only those seeds needed for immediate use, minimizing the interval between treatments and planting. Do not store excess treated seeds beyond planting time. Treated seed must not be used for or mixed with food or animal feed, or processed for oil.
