VIGORO VITAMIN B1

GENERAL INFORMATION

Vigoro Vitamin B1 plus Alpha Fluoracetate Acid - Acid is a Green Cuticle dye and transplant shock stopper. It can be applied to soil or foliage. It may be used with Water Soluble Vitamins or other plant growth regulators. The recommended dose is 1-3 per plant. Vigoro Vitamin B1 plus Alpha Fluoracetate Acid - Acid is a water soluble product. The green color is due to the presence of Chlorophyll.

DO NOT SPILL ON LEAVES. THIS PRODUCT MAY BE USED IN WATER
application when watering the plants. If the plant of stems become instantly, or almost instantly, yellowish brown, stop applying and get them they receive full sun. Full sun is best.
