AND OTHER BROADLEAFED WEEDS

The plant food supplies the quick pick up needed to fill out bare spots left by dead weeds and helps prevent re-establishment of weeds by encouraging growth and formation of thick, weed resistant turf.

HOW TO USE

APPLY ONLY IN WARM WEATHER WHEN SOIL MOISTURE IS PLENTIFUL AND WEEDS ARE ACTIVELY GROWING.
Weeds are hard to kill when weather is cool. In the early spring or during hot, dry summer weather for best results, apply while lawn is wet with dew or after sprinkling lightly. Apply several days after mowing to allow for the presence of plenty of leaf surface to eat it and retain K MART WEED and FEED; then do not mow or water lawn for another day. Let your spreader, as shown below, then cover your lawn evenly.

SUGGESTED SPREADER SETTINGS

(May vary with age, model and condition of spreader. Check your spreader by trial over a known area. One bag feeds and weeds 5,000 sq. ft.)
