GOLDEN VIGORO

MOSS KILLER PLUS LAWN FERTILIZER

12-2-2

GUARANTEED ANALYSIS

TOTAL NITROGEN (N) 12.2%
0.5% Ammoniacal Nitrogen (derived from ammoniated phosphates and ammonium sulfate)
3.5% Water Insoluble Nitrogen (derived from "Isobutylidene Urea")
8.2% Water Soluble Nitrogen (derived from urea and "Isobutylidene Urea")
AVAILABLE PHOSPHORIC ACID (P₂O₅) (derived from ammoniated phosphates) 2.8%
SOLUBLE POTASH (K₂O) (derived from sulfate of potash) 2.8%
IRON EXPRESSED AS ELEMENTAL (Fe) (derived from ferrous sulfate) 0.8%
"Isobutylidene Urea (IBU) is a fertilizer material providing a slowly available form of Nitrogen. Slow release properties of the material are controlled by virtue of IBU's slow particle size surface. These particles, in this product, are embedded in a relatively soluble matrix of ammoniated plant nutrients. Manufactured by Buhk Agricultural Chemicals Corporation, Chicago, Illinois 60634.

MONEY BACK PROMISE

You must be pleased with the results or you are entitled to your money back. Simply send sales slip to VIGORO, Chicago, Illinois - 60634 for prompt refund.

**CAUTION: WILL STAIN CEMENT, STONE AND PAINT.
FLUSH OFF ALL SPILLAGE WITH WATER.**

EASY TO USE

Apply when moss is actively growing, preferably in winter or early spring. If application is to be made in summer or during period of dry weather, mow lawn prior to mowing application and after application continue watering program to maintain good growing conditions.

APPLICATION STEPS

1. Mow lawn, removing as much moss and grass mat as possible.
2. Mow lawn to a height of 1 inch and remove clippings.
3. Make application of Golden Vigoro Moss Killer Plus Lawn Fertilizer with fertilizer spreader at rate of 1 1/2 lb per 125 sq ft (25 lb bag covers 2500 sq ft or area 25 x 100).
4. Covering the entire lawn area will give superior results to spot treatment.
5. Follow application immediately with thorough watering in order to remove product from grass blades and bring product down into root zone.
6. In order to promote healthy lawn follow feeding program recommended below.

Yearly applications may be required as a prevention for new infestations of moss. Healthy lawns are more resistant to disease and insect damage. In order to keep lawns in a healthy condition a proper feeding program is important. Grass requires several plant food nutrients. These include Nitrogen, Phosphorus, Potash and Iron. Nitrogen is one of the most essential. Six to eight pounds of actual Nitrogen per 1000 square feet should be fed to lawns annually during the growing season. Some forms of Nitrogen are highly soluble and readily available for plant use. This form of Nitrogen gives grass a quick green-up. Other forms of Nitrogen are less soluble and are slowly available. Slow or even-release forms of Nitrogen have the advantage of being the release of Nitrogen with the nutritional needs of grass. All Golden Vigoro Products are formulated with rapidly available Nitrogen for quick green-up and I.B.U., a patented form of even-release Nitrogen for slow feeding.

GOLDEN VIGORO LAWN PROGRAM

Golden Vigoro Moss Killer Plus Lawn Fertilizer—Apply in winter or early spring following instructions on this package.
Golden Vigoro Lawn Fertilizer—Feed every month during the growing season. Monthly applications insure a steady rate of growth.
Fall applications during the months of September and October will build a better lawn for next spring.
The above program using Golden Vigoro Products will help produce a moss, insect and weed free lawn for your maximum enjoyment.

HOW TO SET YOUR SPREADER

Cyclone	5	Scotts	7 1/2
R-Mark	5	Sears	7 1/2
Lawn Beauty	5	Wards	8 1/2

Note: Spreader rate varies with walking speed. Check spreader over known area.

CAUTION

Harmful if swallowed. Do not reuse empty container. Destroy when empty.
