1 gallon

**CAUTION!**

May be fatal if swallowed or absorbed through skin. Do not breathe vapor or spray mist. Avoid contact with skin and eyes. Wash thoroughly after handling. Avoid contamination of food or foodstuffs. In case of contact, wash with soap and water.

Keep children and pets off treated areas until this material has been thoroughly watered into the soil and the grass has completely dried.

Do not contaminate any body of water. Do not contaminate ornamental fish ponds. This product is toxic to fish and wildlife.

Do not reuse empty container. Wash thoroughly with water and detergent. Discard in a safe place.

**SPRAYING EQUIPMENT**

**GARDEN HOSE SPRAYERS:** Such as the instant Vigoro Lawn Gun that are gauged to apply 15 to 20 gallons to apply one quart per acre. For better penetration into the grass and are best suited for lawn. Simply mix one pint of Vigoro Chinch Bug Killer and one pint of water in the jar and use as directed.

**PRESSURE SPRAYING:** Any type satisfactory if it will deliver 15 to 20 gallons of water to 500 square feet. Mix one quart of Vigoro Chinch Bug Killer into 15 to 20 gallons of water and use as directed.

### DIRECTIONS FOR USE

Use only after dilution with the proper amount of water, as indicated below. These large amounts of water aid penetration into the deep mats of turf where chinch bugs feed. Spray the designated area so it is completely and uniformly covered. Thoroughly wash sprayer with water after using. If container is empty, flush with water and detergent. Do not reuse empty container. Labeled in a safe place.

**LAWN AND TURF MATS:** For best results for chinch bug control, lawn should be thoroughly watered prior to application of Vigoro Chinch Bug Killer.

**CHINCH BUG CONTROL:** Vigoro Home Sprayer or similar application device (this type hose sprayer with one nozzle nozzle that fits 1/2 to 20 p.s.i.). Pour 1 pint of 1.0% solution in the container of chinch bug spray water, attach hose and apply to 100 square feet (10' x 10' area) of lawn.

Mix 1 quart in 30 to 50 gallons of water and apply to 100 square feet (5' x 20 feet) of lawn with a sprayer or nozzle for this type of spraying.

If infestation is severe, repeat applications may be necessary at 4 week intervals. For prevention of chinch bug, apply early in the season and repeat at 4 to 6 week intervals in cool, moist weather.

**SOFT WEATHER:** Use 1 pint of Vigoro Chinch Bug Killer on heavily matted lawns and 1/2 pint on thinner lawns per 1000 square feet. Use in excess of water for complete coverage of areas. Mowing of lawns prior to spraying is not necessary. Grass should be examined every few days for young worms. Repeat as necessary.
