

SWIFT CHINCH BUG KILLER

NET CONTENTS 1 GALLON

Swift Chinch Bug Killer is a water emulsifiable concentrate designed to kill chinch bugs and sod webworms. It mixes readily with water and is especially designed for use with hose sprayers.

Garden hose sprayers such as the Vigoro Lawn Gun that are gauged to apply 15 to 20 gallons to empty one quart jar will provide good coverage and penetration. Other similar type sprayers will do a satisfactory job.

DIRECTIONS FOR USE ON LAWNS

It is very important to use according to directions. Otherwise serious injury may occur to plants or persons.

CHINCH BUGS: Apply 1¼ quarts of Swift Chinch Bug Killer in 30 to 40 gallons of water to 550 square feet of lawn (50' x 11'). Be sure the spray penetrates heavily matted turf to obtain maximum kill. Thorough watering before application is helpful. Do not mow lawn for 24 hours after use.

SOD WEBWORMS: Use 1¼ quarts of Swift Chinch Bug Killer on heavily matted lawns or 1 quart on thinner sod. Allow two days for good kill. Examine lawn periodically for new broods. Spray before injury shows up in lawn. Do not mow lawn for 24 hours after use.

CAUTION: DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.
Harmful if swallowed. May be injurious to eyes and skin. May be absorbed through skin. Keep out of reach of children. Do not breathe vapor of spray mist. Do not get in eyes, on skin or on clothing. In case of eye contact, flush with plenty of water and get medical attention. Wash thoroughly after handling. Keep children and pets off treated areas until this material has been thoroughly watered into the soil and grass has completely dried. Do not contaminate feed or foodstuffs. Keep out of reach of children.

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

In case of breakage, cover immediately with sufficient garden soil or any other absorptive materials to thoroughly soak up liquid. Sweep and bury. Wash area thoroughly with soap and water containing household ammonia.

All disposable metal and glass containers should be flushed out with water, punctured or broken and disposed of by burying or at an approved dump or sanitary landfill.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

NOTE TO PHYSICIAN: Active ingredient is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote.
