

PLANT	TO CONTROL	WHEN TO APPLY
Citrus	Citrus Rust Mite	Apply when bloom petals drop. Apply in 60 days as needed.
Roses	Black Spot	Apply when disease appears. Repeat at 7 day intervals and after rains.
Beans, Peas & Flowers	Red Spider Mite Powdery Mildew	Apply when pests cause damage. Repeat as needed.
Avocados	Mites	Apply at petal fall and every 10 to 14 days thereafter until control is achieved.

Swift Wettable and Dusting Sulphur can be used as a spray, dust or as a soil acidifying agent.

DUST APPLICATION Apply with a good hand duster when air is calm, covering all plant parts fully and completely.

SPRAY APPLICATION Dilute at the rate of 3 level spoonfuls of this product per gallon of water (up to 10 gallons of water) for insect control. For fungus control on roses, beans, and peas, use 0.4-0.8 pounds of this product per 10 gallons of water. For fungus control on ornamentals, use 0.5-0.6 pounds of this product per 10 gallons of water. Spray plants thoroughly, wetting underside of leaves. Any type of hand sprayer or hose attachment sprayer is satisfactory.

SOIL APPLICATION To correct excessive alkalinity or increase soil acidity around acid loving plants such as Gardenia, Ixora, Azalea, Camellia, apply to soil at rate of 2 pounds of this product per 100 square feet of soil area.

CAUTION

Do not dust or spray plants with sulphur closer than one month to an oil spray. Sulphur may burn foliage when temperatures are excessively high.

Keep out of lakes, streams, ponds, tidal marshes and estuaries. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

Do not reuse container. Destroy when empty.
