

**VIGORO®**

**VIGORO CHINCHBUG & SOD WEBWORM KILLER**

Vigoro Chinchbug & Sod Webworm Killer is a water emulsifiable concentrate designed to kill chinchbugs and sod webworms. It mixes readily with water and is especially designed for use in hose sprayers.

Garden hose sprayers such as the Vigoro Lawn Weed-N-Feed Sprayer that are gauged to apply 15 to 20 gallons to empty one quart jar will provide good coverage and penetration. Other similar type sprayers will do a satisfactory job.

**DIRECTIONS FOR USE ON LAWNS**

It is very important to use according to directions. Otherwise serious injury may occur to plants or persons.

**CHINCHBUGS:** Apply 1/2 pint of this product in 15 to 20 gallons of water to 500 square feet of lawn (an area 50' x 10'). Apply when activity or damage appears (yellowing, thinning or browning of grass often develops in spots and then spreads out over the lawn). To prevent damage, apply as soon as daily temperatures reach 80° F. and repeat every two months. Be sure the spray penetrates heavily matted turf to obtain maximum kill. Thorough watering before application is helpful. Do not mow for 24 hours following treatment.

**SOD WEBWORMS:** Use 1/2 pint of this product in 15 to 20 gallons of water to 500 square feet of lawn area for normal lawn and turf for treatment. Apply twice, 10 to 14 days apart. For severe infestations, repeat every 10 to 14 days for a total of three applications.

**CAUTION**

**CAUTION - Keep Away From Heat and Open Flame**

May be absorbed through skin. Keep out of reach of children. Harmful if swallowed. Avoid breathing of dust or spray mist. Avoid contact with skin, eyes, or clothing.

In case of eye contact, flush with plenty of water and get medical attention. Wash thoroughly after handling. Keep children and pets off treated areas until this material has been thoroughly watered into the soil and grass has been completely dried. Do not contaminate feed and foodstuffs. Keep out of reach of children.

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

In case of breakage, cover immediately with sufficient garden soil or any other absorptive materials to thoroughly soak up liquid. Sweep and bury. Wash area thoroughly with soap and water containing household ammonia.

All disposable metal and glass containers should be punctured or broken and disposed of by burying at approved dump or sanitary landfill. This product is toxic to fish and wildlife. Keep out of any body of water.

This product is highly toxic to bees exposed to it during the part of their life cycle. For more information, contact your distributor or your State Agricultural Experiment Station.

**FIRST AID TREATMENT**

**ANTIDOTE:** If swallowed, give a large amount of water or milk or warm water and repeat until vomit has been completely vomited down and keep quiet. **CALL A PHYSICIAN IMMEDIATELY.**

If on skin, in case of contact, remove contaminated clothing and immediately wash skin with soap and water.

**NOTE TO PHYSICIAN:** Active ingredient is a cholinesterase inhibitor. Treat symptomatically. Atropine is an antidote.
