Our
Environment:

Besides increasing property values, did you know a
well-maintained lawn provides the following benefits
to your home and environment...

- A 50' x 50' lawn produces enough oxygen for a family of four every day!
- Controls Erosion
- Reduces Glare
- Traps Dust, Smoke Particles and other Pollutants
- Purifies Water
- Reduces Noise
- Improves Soil Condition
- Modifies Temperature

Grass Clippings and yard waste are approximately 20% of the volume in our nation's landfills. To do your part to reduce this amount, leave grass clippings on your lawn. Increased mowing height and frequency will produce smaller grass clippings that will decompose more readily so nutrients will go back into your lawn.
