VIGORO

CRABGRASS PREVENTER PLUS LAWN FERTILIZER

22-3-11

TOTAL NITROGEN (N)..... 22.0%

1.3% Ammoniacal Nitrogen
5.5% Coated Slow Release Urea Nitrogen
15.2% Water Soluble Urea Nitrogen

AVAILABLE PHOSPHORIC ACID (P₂O₅) 3.0%

SOLUBLE POTASH (K₂O)..... 11.0%

Derived from ammoniated phosphates, urea, sulfur-coated urea and muriate of potash. Potential Acidity 400 lbs. Calcium Carbonate Equivalent per ton. Manufactured by Estech, Inc., Chicago, Illinois 60602. Vigoro^R is a registered trademark of Estech, Inc.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing dust. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling.

ENVIRONMENTAL HAZARD

Do not apply directly to water. Do not apply when weather conditions favor drift from target area. Do not contaminate any body of water by cleaning of equipment or disposal of wastes.

REAR PANEL (contd.)

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Apply Vigoro Crabgrass Preventer Plus Lawn Fertilizer early in the spring. It kills crabgrass and weed seedlings just as they are sprouting from the seed, so get it on early. This should be done one to two weeks prior to the germination of annual grass weed. It will not control established weeds.

1. Apply contents of this bag to 5,000 sq. ft. for northern (cool season) turfgrasses.
2. For southern (warm season) turfgrasses, apply contents of this bag to 3,750 sq. ft.
3. It is essential to apply very evenly with no skips or misses. Calibrate and check application equipment prior to use. Set spreader according to chart below, then cover the area twice, the second time at right angles to the first.
4. Water after application for optimum weed control.

When applied as directed, the following weeds in established turf are controlled: crabgrass, foxtails and barnyard grass with an application in spring; goosegrass with an early summer application: annual bluegrass (Poa Annua) in northern areas with a late summer and early spring application. Vigoro Crabgrass Preventer Plus Lawn Fertilizer is tolerant to the following turfgrasses when applied as directed.

Kentucky bluegrass	Fescue	Bermudagrass
Perennial ryegrass	Zoysiagrass	St. Augustine grass
Centipedegrass		Bahiagrass

PRECAUTIONS: This product may thin established annual bluegrass and should not be applied in the spring to turfgrass planted the previous fall. Do not apply to bentgrass putting greens or dichondra turf. Avoid any cultural practices that disturb the soil such as raking, aerification or verticutting after application of this product. Re-seeding of treated areas should be delayed for at least 6 weeks after applying this product.

SUGGESTED SPREADER SETTING

COVER AREA TWICE: Second time at right angles to first for thorough coverage.

REAR PANEL (contd.)

SPREADER	NORTHERN	SOUTHERN
	(cool season) grasses	(warm season) grasses and Poa Annua control in northern areas
Cyclone	4 1/2	4 3/4
Sears	5	5 1/2
Wards	4	4 1/2
Vigoro Rotary	4 1/2	4 3/4
Scotts	4 3/4	5 1/2
Kmart	2	2
Vigoro drop	5	5 3/4

NOTE: Spreader settings are approximate. Check by trial over known area.

Storage: Store in original container in safe, dry place. Do not contaminate other pesticides, fertilizer, seeds, food or feed. Return spillage to original container prior to disposal.

Product Disposal: Securely wrap original container in several layers of newspaper and discard in trash.

Container Disposal: Do not re-use bag. Discard bag in trash.
