

QUAT-128

4

CLEANER - DISINFECTANT - DEODORIZER - FUNGICIDE - VIRUCIDE*
FOR HOSPITAL AND INSTITUTIONAL USE

Buckeye SANICARE QUAT-128 is a concentrated biodegradable, quaternary ammonium bactericidal detergent with excellent organic soil tolerance.

Designed for use in hospital, institutional and industrial housekeeping disinfecting programs, QUAT-128's disinfecting action has been verified in the AOAC use-dilution test against Staphylococcus aureus, Salmonella choleraesuis and Pseudomonas aeruginosa in the presence of significant amounts of organic matter.

This versatile, low foaming, concentrated germicide effectively cleans and disinfects hard environmental surfaces such as floors, walls, woodwork, tables, chairs and is safe to use on any surface not harmed by water.

Cross-infection is a major housekeeping concern, not only in hospitals, but in schools, institutions and industry. QUAT-128 is formulated for this problem area. It cleans, disinfects and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-infection.

Buckeye SANICARE QUAT-128 is virucidal against Herpes Simplex (a virus that causes chicken pox, several brain infections and infectious mononucleosis), Vaccinia (representative of pox viruses) and Influenza A₂ (Hong Kong flu virus) on inanimate environmental surfaces.

DIRECTIONS FOR USE:

Apply QUAT-128 to floors, walls, and other hard surfaces such as tables, chairs and bed-frames with a cloth or mop. This product will clean and disinfect in the presence of organic soil when used as directed.

For routine disinfecting in hospitals, nursing homes, schools, institutional and industrial uses, add one ounce per gallon of water.

At one ounce per gallon use-level, QUAT-128 is effective against Pseudomonas aeruginosa, Staphylococcus aureus, and Salmonella choleraesuis.

*At one ounce per gallon use-level, QUAT-128 is virucidal against Herpes Simplex, Vaccinia, and Influenza A₂ (the Hong Kong flu virus).

DIRECTIONS FOR USE: Continued

One ounce of QUAT-128 per gallon of water will deodorize bathrooms, garbage storage areas, and other areas where bacterial growth can cause mal odors.

When encountering excessive amount of organic soil in hospitals, nursing homes, schools, institutional and industrial uses, use two ounces per gallon of water.

At two ounces per gallon use-level, QUAT-128 is effective against *Pseudomonas aeruginosa*, *Staphylococcus aureus*, and *Salmonella choleraesuis*. Germicidal performance against these organisms has been confirmed by the AOAC use-dilution test in the presence of organic soil.
