INDUSTRIAL GRADE CLEANER DISINFECTANTS

ACCEPTED

DEC 3 01968

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 557-25

**CLEANER - DISINFECTANT - DEODORIZER - FUNGICIDE - VIRUCIDE\***  
FOR INDUSTRIAL AND INSTITUTIONAL USE

Not only hospitals must constantly combat the threat of cross-infection, but schools, factories, commercial buildings, are all becoming more concerned every day with the control of bacteria.

When used as directed, the hard surface disinfecting action of this exceptional bactericidal detergent will do the job easily and quickly with a delightful fragrance that's formulated to be as powerful as it is pleasant.

Available in Lemon, Pine or Mint scent, this 1-64 formulation is an extremely effective sanitizer. It cleans and sanitizes in waters up to 1000 ppm hardness and insures complete sanitizing action when used as directed.

In addition, will deodorize toilet areas, behind and under sinks and counters, garbage cans, garbage storage areas and other places where bacterial growth can cause mal odors.

#### DIRECTIONS FOR USE:

Add two ounces per gallon of water. Apply to floors, walls, and other hard surfaces such as tables, chairs and bedframes with a cloth or mop.

At two ounces per gallon use-level, effective against *Staphylococcus aureus*, *Salmonella choleraesuis*, *Escherichia coli*, and *Trichophyton interdigitale*, the athlete's foot fungus. Germicidal performance against the first three organisms has been confirmed by the AOAC use-dilution test. Fungicidal performance against *T. interdigitale* was determined by the AOAC Fungicidal test.

\*At two ounces per gallon use-level, virucidal against Herpes Simplex (a member of the virus family that causes infectious mononucleosis), Vaccinia (representative of the pox viruses), and Influenza A2 (the Hong Kong flu virus), on inanimate environmental surfaces.

Use for sanitizing and cleaning utensils, equipment, and other hard surfaces. When sanitizing food processing equipment and utensils and food contact surfaces, a potable water rinse is required. Add one ounce per gallon of water for sanitizing.
