IDEAL FOR TOTTED PLANTS, HANGING BASKETS AND FLOWER BOXES

DIRECTIONS FOR USE

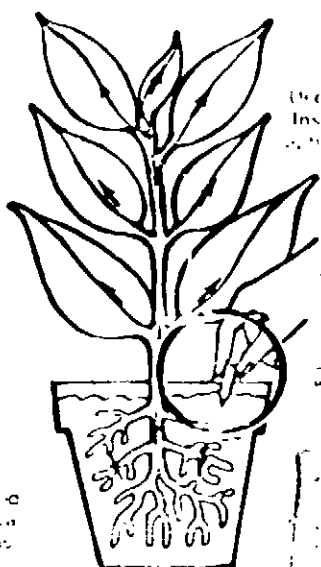

General Use: Insert one stick in the soil of each pot. For hanging baskets, insert one stick in each basket. For flower boxes, insert one stick in each box.

HOW IT WORKS

EAG A-RIG Time-Release Insecticide Sticks contain a special active ingredient which is released slowly to the soil and is absorbed by the roots and is transported to the leaves of the plant. No contact with insects or spiders is necessary since the active ingredient is transported to the insect's body.

For best results, use 27 sticks per square yard of plants. The active ingredient is released slowly and is transported to the insect's body.

For best results, use 27 sticks per square yard of plants. The active ingredient is released slowly and is transported to the insect's body.

HOW TO USE

Use EAG A-RIG Time-Release Insecticide Sticks for control of softy apids, spidermeins, mealybugs, weevils, leafhoppers, and aphids on indoor and outdoor plants only. Do not use on vegetable crops.

For best results, use 27 sticks per square yard of plants. The active ingredient is released slowly and is transported to the insect's body.

For best results, use 27 sticks per square yard of plants. The active ingredient is released slowly and is transported to the insect's body.
