To Control Flies in Dairy Barns:—For best results close all doors and windows as much as possible and keep closed for 10 minutes after spraying. Remove or cover all milking equipment, then spray for 2 to 4 seconds for each 1,000 cubic feet of closed space or approximately 1 second per animal stabled.

Method of Applying:—Spray upward and over each cow not on them for a period of approximately 1 second per cow.

"WFL-100" AEROSOL should be applied before milking each morning and evening for the first two days. Then apply only in the morning or evening every third day or according to the fly infestations. Hold beam at least 2 feet away from objects at all times. Repeat applications as necessary.

To Control Flies in Horse Stables, spray 2 to 4 seconds per 1,000 cubic feet.

BACK LABEL

To kill **FLIES AND MOSQUITOES**, close all windows, doors, etc. Spray all parts of room at rate of 4 seconds per 1,000 cubic feet. Keep closed for at least 15 minutes after spraying. For temporary protection out of doors spray lawn ground and bushes.

To kill **COCKROACHES, TERMS, SILVERFISH, AND SPIDERS**, spray directly into cracks, cupboards, drawers and other secluded places. Direct aerosol at insects when they appear and repeat spraying as necessary.

To kill **ANTS**, spray where insects are located and directly on insects where possible. Spray ant trails, door sills and window frames or wherever ants may enter home. Repeat spraying as needed.

To kill **BED BUGS**, spray bed and mattress thoroughly. Direct spray into cracks and hiding places around baseboards, walls and floors. Repeat spraying as necessary.

To kill **CLOTHES MOTH**, spray garments thoroughly directing spray into all folds and seams. Spray also closets and trunks where garments are stored. Repeat about every 30 days.
