Gentlemen:

Subject: Amendment - Update Label
Rockland Super Kleen-Kow
EPA Registration No. 572-150
Your submission received January 14, 1985

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable and a stamped copy is enclosed for your records.

The following changes should be made at the next label printing or within one year, whichever comes first:

1. A Statement of Practical Treatment must be added to the labeling. Any duplicate statement appearing in the current Hazards to Humans and Domestic Animals section may then be deleted. We suggest the following text, however, if your toxicological data suggests otherwise please submit a draft Statement of Practical Treatment for approval:

If swallowed - Call a physician or Poison Control Center immediately. DO NOT INDUCE VOMITING. Vomiting may cause aspiration pneumonia.

If inhaled - Remove victim to fresh air. Apply artificial respiration if indicated.

If on skin - Remove contaminated clothing and wash affected areas with soap and water.

If in eyes - Flush eyes with plenty of water. Call a physician immediately.

Note to Physician - Solvent presents aspiration hazard. Gastric lavage is indicated if material was taken internally. If symptoms of cholinesterase inhibition are present, atropine sulfate by injection is antidotal. 2-PAM is also antidotal and may be administered, but only in conjunction with atropine.

1-5 # 5-1-150
1-2-150
1-3-150

2. Add the following to the "Do not wet the skin.." paragraph:

Do not contaminate feed, food, water, milk, or milking utensils. Do not use this product on animals simultaneously or within a few days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals. Do not apply in combination with trichlorofon.

3. Add an Environmental Hazards section to the Precautionary Statements part of the label to read as follows:

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of wastes.

4. Add the heading "PHYSICAL OR CHEMICAL HAZARDS" over "Do not use, pour spill or store near heat or open flame". Note that this section should appear directly after the Environmental Hazards section. The identical sentence may then be deleted from the Storage and Disposal section.
5. Add directions to wash the teats of sprayed or fogged animals with an approved cleansing solution and then dry them prior to milking.

Sincerely yours,

George T. LaRocca
Product Manager (15)
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

SUPER KLEEN-KOW is a specially prepared ready-to-use insecticide for use in conventional hand, power, or automatic spray equipment. Use as directed on Beef Cattle and Lactating Dairy Cattle.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Do not apply to humans. Keep away from heat and open flame. Avoid prolonged or repeated inhalation of mist and contact with skin. In case of contact with skin or eyes, flush with plenty of water; for eyes, get medical attention. Keep away from open flame. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate food, water or foodstuffs. Keep out of reach of children. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal.

STORAGE AND DISPOSAL

STORAGE: Store unused material, in original container only, in a locked storage area out of reach of children and animals. Keep container tightly closed. Do not contaminate water, food or feed by storage or disposal. Do not use, spill or store near heat or open flame.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

DISPOSAL: ONE GALLON - Do not reuse empty container. Securely wrap in several layers of newspaper, and discard in trash. Rinse thoroughly before discarding in trash. **FIVE GALLONS & LARGER -** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or, puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

ACCEPTED
with COMMENTS
in EPA Letter Dated:

MAR 8 1955

Under the Federal Insecticide, Fungicide, and Plant Disease Act as amended, for the product registered under EPA Reg. No. 572-150

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Spray SUPER KLEEN-KOW daily before milking. Spray as a fine mist starting from the front of the animal and thoroughly cover all parts of the animal including the legs. Apply 2 ounces per animal per day but do not spray in excess of 2 fluid ounces per day.

An acceptable spraying schedule is 2 ounces per animal before the morning milking or 1 ounce per animal before each milking. For best pasture protection a morning spraying is the most important spray.

Do not wet the skin due to possible skin irritation. Do not apply regularly to calves under 6 months of age. Brahman cattle should not be treated as they may show hypersensitivity to organic phosphates.

FOR FACE FLIES: To protect animals from Face Flies, spray animal's head covering forehead, poll, muzzle and sides of face thoroughly with spray mist but do not apply more than 1 ounce to entire animal at any one spraying.

FOR USE IN ELECTRIC PROCESS AND STATIONARY SPRAYERS: SUPER KLEEN-KOW is recommended for use in stationary sprayers or electric foggers. Fog 1 to 2 ounces per 1000 cubic feet. In stationary sprayers apply 1 to 2 ounces per animal before milking as animals pass through. Do not exceed spraying 2 ounces per animal per day.

BACK RUBBERS: For the control of horn flies and face flies on lactating dairy and beef animals, use SUPER-KLEEN-KOW in back rubbers and face rubbers. Use 1 gallon for each 20 linear feet of burlap back rubber. For automatic back rubbers recharge the reservoir as needed. Animals must rub face on rubbers for best face fly control.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label.
