Petroleum Distillate	9.0%
INERT INGREDIENT	73.5%
TOTAL	100.0%

MOSQUITO CHASER

TREATS **5000** SQ. FT.

cRc **ROCKLAND**
MOSQUITO CHASER

DIRECTIONS FOR APPLICATION:

ROCKLAND MOSQUITO CHASER is a dry and easy to apply. It does not require mixing, no water. Simply broadcast by hand or machine, or scatter on the ground, or use lawn spreader, dusting or hand-brink water. Also treat heavy vegetation.

One application can be 100% effective from time of application up to two days and significantly effective (virtually no mosquitoes) up to eight days after application, depending on rainfall and wind currents which cause reinfestation.

Best results are obtained in quiet or relatively still air (such as early evening periods). Application should be made about an hour before the area is to be occupied. Below are some suggestions for application.

APPLY AT THE RATE OF ONE-HALF CUP PER HUNDREY SQUARE FEET (100 SQ. FEET). DO NOT OVERDOSE DESIRABLE PLANT AREAS. ALWAYS TREAT WITH LARGER THAN THAT TO BE OCCUPIED. DO NOT HARM FLOWERS, LAWNS, OR SOIL.

Apply liberally to new lawns with the following: 1. Apply to the entire lawn area immediately after seeding. 2. Apply to the entire lawn area immediately after the lawn becomes reseeded.

WARRANTY: This product is warranted to be effective against mosquitoes for the period of time stated above. It is not a guarantee of protection against mosquitoes. The user should read the instructions carefully and follow them.

ROCKLAND MOSQUITO CHASER

DIRECTIONS FOR APPLICATION:

ROCKLAND MOSQUITO CHASER is quick and easy to apply. It is ready to use; no mixing, no water. Simply broadcast by hand or punch holes in bag and scatter on the ground, or use lawn spreader, dust gun or hand crankduster. Also treat heavy vegetation.

One application can be 100% effective from time of application up to two days and significantly effective (virtually no mosquitoes) up to eight days after application, depending on rainfall and wind currents which cause reinfestation.

Best results are obtained in quiet or relatively still air (such as early evening periods). Application should be made about an hour before the area is to be occupied. Below are some suggestions for application.

APPLY AT THE RATE OF ONE-HALF CUP PER HUNDRED SQUARE FEET (10 x 10 FEET). DO NOT OVERDOSE DESIRABLE LAWN AREAS. ALWAYS TREAT AREA LARGER THAN THAT TO BE OCCUPIED. WILL NOT HARM FLOWERS, SHRUBS, LAWNS, OR SOIL.

Apply liberally to heavy growth, moistened by early evening dew. Apply to 5000 sq. ft. area around, but not on area to be occupied. Repeat applications when area becomes reinfested (i.e. when mosquitoes become annoying).
