### DIRECTIONS FOR USE

SUPER DURSBAN\* LAWN INSECTICIDE is a Chlorpyrifos-coated corn cob granular for control of Ants, Brown Dog Ticks, Chinch Bugs, Crickets, Cutworms, Earwigs, Hyperodes (Turfgrass) Weevils, Sod Webworms, (Lawn Moths), Sowbugs, (Pillbugs) and White Grubs on lawns and around buildings.

Spread evenly at the rate of 1 pound per 1000 square feet. After application, water lawn using 30 gallons per 1000 square feet.

To control ANTS, BROWN DOG TICKS, CRICKETS, CUTWORMS, EARWIGS, SOD WEBWORMS and SOWBUGS — Make first application when pests appear and retreat as needed. For best results, turf should be moist at time of treatment.

To control CHINCH BUGS — Consult your local state agricultural extension agent as to the exact timing.

**NOTE:** To reduce initial infestation of buildings by Earwigs, treat a band of ground 6 to 10 feet wide around and adjacent to the buildings where these pests are active.

For best results, treat when grubs are young and actively feeding near the soil surface, usually during late July and August. Consult your local agricultural extension service specialist for proper time to treat in your area.

CYCLONE #4½-5½
