NET CONTENTS: 5 GALLONS

KILLS AND REPELS HORN FLIES, STABLE FLIES, MOSQUITOES AND GNATS. WHEN PROPERLY APPLIED, THE REPELLENT EFFECT AGAINST ABOVE INSECTS WILL LAST TWO DAYS.

DIRECTIONS READY TO USE

Spray "KLEEN-KOW" before milking, starting from the front of the animal, using not more than one to two ounces per animal as a mist. To develop a residual repellency to stable flies, horn flies, mosquitoes and gnats, spray "KLEEN-KOW" Spray as above to each animal for a three day period. Be certain spray covers legs, belly and shoulders. Do not exceed spraying 2 ounces daily per adult cow. Reduce dosage one half for younger animals.

Spray in the same manner again after two days have elapsed and every second day thereafter or when insects again disturb the animal.

Avoid wetting the hides of animals. Do not apply regularly to calves under six months of age. Brahman cattle should not be treated as they may show hypersensitivity to organic phosphates.

To kill flies, mosquitoes and gnats in the barn prior to milking, close all doors and windows and direct the spray toward the ceiling. After filling the barn with mist, it should remain closed for 10 to 20 minutes. Sweep up and destroy fallen insects. Repeat as necessary.

To protect livestock from attack by fleas, spray bedding and walls of pen, particularly cracks and crevices. Repeat treatment frequently until adequate control is obtained.

For Fogging Machines "KLEEN-KOW" can be used in a Fog Sprayer for killing house flies, stable flies and horn flies. Fogging "KLEEN-KOW" will not give maximum repellency.

After animals are stanchioned, close barn doors and windows; spray until foggy using approximately 3 to 4 ounces per 1000 cubic feet. Keep barn closed for 10 minutes after spraying. Repeat fogging as often as necessary.

Do not reuse empty container and/or drum. Destroy by perforating or crushing. Bury or discard in a safe place.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions. 2-PAM is also antidotal and may be administered in conjunction with atropine.

CAUTION: DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME.
