

SPRAY ONLY ON SURFACES. DO NOT USE AS A SPACE SPRAY.

DIRECTIONS FOR USE

INDOOR USE: ANTS, COCKROACHES, CRICKETS, SILVERFISH, SPIDERS, SCORPIONS, SAW-TOOTHED GRAIN BEETLES (EXPOSED STAGE), WATERBUGS: Spray into cracks, crevices, around baseboards, and other places where these insects hide. Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. Repeat as needed. Do not spray foodstuffs or house plants. For ants, spray trails and places where ants enter premises. Do not allow children to contact treated surfaces until surfaces are completely dry.

BROWN DOG TICKS: Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Repeat as needed. Fresh bedding should be placed in animal quarters after spraying. Do not spray animals.

OUTDOOR USE: ANTS, CLOVER MITES, CRICKETS, EARWIGS, FLEAS, MILLIPEDS, SOWBUGS, AND BROWN DOG TICKS: Spray infested areas thoroughly including outside surfaces of screens, doors, window frames, foundations, patios, or other places where insects may enter. For ants, spray hills and runways. Repeat as necessary. Do not spray vegetation.

CAUTION

May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should be avoided. Wash thoroughly with soap and warm water after handling. Avoid contamination of food, utensils, and food preparation areas. Do not use in commercial food preparation areas or in edible products areas of food processing plants. Should poisoning occur, obtain prompt medical aid. Remove pets and cover fish bowls before spraying.

RESTRICTIONS: Do not apply to rugs, carpets, draperies, wallpaper, or similar materials that may be stained. Avoid excessive wetting of plastic, rubber, and asphalt surfaces such as tiles and floor coverings.

ANT AND ROACH SPRAY is a highly effective new formulation which provides rapid kill of such crawling insects as listed below, including those resistant to certain chlorinated hydrocarbon and phosphate insecticides:

Ants	Roaches
Brown dog ticks	Saw-toothed grain beetle
Clover mites	(exposed stage)
Crickets	Scorpions
Earwigs	Silverfish
Fleas	Sowbugs
Millipeds	Spiders

In addition to rapid initial kill, ANT AND ROACH SPRAY stays on treated surfaces and kills insects 1-2 weeks after the spray deposit has dried.

HOW TO USE: Unlike most pressurized residual sprays, ANT AND ROACH SPRAY emits a pencil stream spray allowing the user to direct the spray to a distance of 6 feet. Cracks, crevices, and hard-to-reach locations can be reached without bending, crawling, or climbing. Spray infested surfaces until wet, moving the spray stream rapidly to prevent excessive wetting of surfaces, and waste of material. Point spray away from people, plants, and pets.

CAUTION: COMBUSTIBLE MIXTURE.
Contents under pressure.

FLAMMABLE: Do not spray into or near heat or open flame. Do not smoke while using. Keep container away from stoves, radiators, or other hot surfaces. Do not place in direct sunlight. Temperatures exceeding 120° F. may cause the container to burst. Do not puncture or throw into fire.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

ACTIVE INGREDIENTS:

o-Isopropoxyphenyl Methylcarbamate*	0.5%
Kerosene	80.8%
INERT INGREDIENTS:	18.7%
	<hr/> 100.0%
