Weeds will not be controlled once they have emerged. Destroy existing weeds prior to treatment. Rainfall or overhead irrigation following application improves weed control.

HOW AND WHEN TO APPLY

Apply in Spring before Crabgrass and other annual grasses germinate. For top kill of Bermuda grass and control of established weed grasses, such as annual bluegrass, apply anytime during season. 3 to 4 weeks are required for control. Apply 3 lbs. per 1,000 sq. ft. (Use both #2 and #3 Hopper in order to spread recommended amount).
