

ROCKLAND rat bait is formulated specifically for better results. It is scientifically balanced to get results. It contains all essential nutrients. They eat themselves to death.

DIRECTIONS

FOR RATS — USE AS FOLLOWS:

1. Place $\frac{1}{2}$ to 1 pound of bait per station.
2. Treated baits should be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamper-proof bait boxes.
3. Bait must be exposed until signs of feeding have ceased. An uninterrupted supply of bait should be maintained for at least 10 days.

FOR MICE

1. Tablespoon amounts ($\frac{1}{4}$ to $\frac{1}{2}$ ounce) of bait should be placed 8 to 12 foot intervals.

2. Bait stations should be not more than 12 feet apart, 6 to 10 feet will be more effective. Treated baits should be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamper-proof bait boxes.

3. Bait should be exposed until control is achieved or until feeding ceases. An uninterrupted supply of bait should be maintained for at least 15 days.

Place several feed stations in locations frequented by rats or mice. Continuous feeding should give more complete control. Replace all empty bait stations within 24 hours. Bait should be available to rodents until complete lack of feeding is noticed. Sour, or dirty bait should be replaced. Use one lb. of RAT-OLA bait when more than one rat is to be controlled.

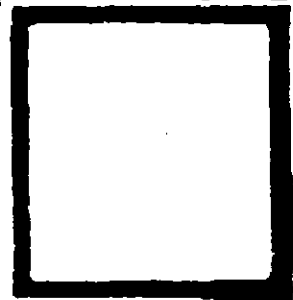

CAUTION: Keep away from humans, animals, wildlife, and pets. If swallowed by humans, animals, wildlife or pets, this material will reduce the clotting ability of the blood, and will cause bleeding. Give intravenously Vitamin K, with blood transfusions.

Do not reuse empty container. Destroy when empty by perforating and burying in a safe place.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
