JUDITH K. LEMM  
ROCKLAND CORPORATION  
686 PASSAIC AVENUE BOX 809  
WEST CALDWELL, N.J. 07007

OFFICE OF  
PREVENTION, PESTICIDES AND  
TOXIC SUBSTANCES

SUBJECT: Label Amendment Submission of 12/08/93 in Response to PR Notice 93-7  
EPA Reg. No. 572-273  
ROCKLAND THREE-WAY LAWN WEED KILLER

Dear Registrant:

The labeling cited above and submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, successfully **REMOVES THE PRODUCT FROM THE SCOPE** of PR Notice 93-7 once the comments (if any) on the attached sheet are addressed. Other than the alterations (if any) listed on the attached sheet, no further alterations to the labeling are necessary to reflect the requirements of the Worker Protection Standard.

Since your amendment proposes to delete uses directly and/or to delete uses implicitly through the use of exclusionary statements, the Agency will publish in the Federal Register a notice of receipt of your amendment to delete uses, as required by section 6(f)(1) of FIFRA. The Agency will defer action for 90 days from the date of the Federal Register notice to give affected minor users an opportunity to try to persuade you to retain the uses(s). When the comment period has expired, the Agency will approve the amendment unless you have withdrawn it, and stamp the amended labeling "accepted." Your stamped-accepted labeling will then be sent to you.

As described in Supplement A of PR Notice 93-11 (self-verification option), you may sell and distribute product bearing the submitted labeling before you receive a copy of your stamped-accepted labeling. Note that your registration is not amended until the comment period required by section 6(f)(1) of FIFRA has expired and the Agency has approved the amendment. Therefore, you may withdraw your proposed amendment at any time during the comment period and until you receive your stamped-accepted labeling.

Sincerely,

*Handwritten signature of James Tompkins*

## Three-Way Lawn Weed Killer

- **Kills Dandelion, knotweed, Henbit, Plantains, Spurge, Poison Ivy, and most other broadleaf weeds.**
  - **One gallon covers 32,000 Sq. Ft.**

---

Contains Trimec Herbicide. Contains 2,4-D, MCPP, and Dicamba

### ACTIVE INGREDIENTS:

*Dimethylamine Salt of 2-(2-methyl-4-chlorophenoxy) propionic acid.....	3.66%
**Dimethylamine Salt of 2,4-Dichlorophenoxyacetic acid.....	7.59%
***Dimethylamine Salt of Dicamba (3,6-dichloro-o-anisic acid).....	0.84%
INERT INGREDIENTS.....	87.91%
	<hr/> 100.00%

### THIS PRODUCT CONTAINS:

- \*0.26 lb. 2-(2-methyl-4-chlorophenoxy) propionic acid per gallon or 3.02%
- \*\*0.543 lb. 2,4-Dichlorophenoxyacetic acid per gallon or 6.30%
- \*\*\*0.059 lb. 3,6-dichloro-o-anisic acid per gallon or 0.69%
- \*\*Isomer Specific by AOAC Method No. 6.DO1-5.

KEEP OUT OF REACH OF CHILDREN

### CAUTION

See Back Panel for Additional Precautionary Statements.

ACCEPTED  
with COMMENTS  
in EPA Letter Dated

APR 21 1994  
Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
as amended, for the pesticide  
registered under EPA Reg. No.  
572-223

## PRECAUTIONARY STATEMENTS

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:** Do not get in eyes. Causes substantial but temporary eye injury. Wear face shield or goggles when mixing, loading or applying this product. Harmful if swallowed. Avoid contact with skin or clothing. Avoid breathing vapors or spray mist. This product may cause dermal sensitization reaction.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish. Do not apply directly to water or wetlands (swamps, bogs, marshes, and potholes). Drift or run-off may adversely affect non target plants. Do not contaminate water when disposing of equipment washwaters. When cleaning equipment, do not pour the washwater on the ground; spray or drain over a large area away from wells and other water sources.

Most cases of groundwater contamination involving phenoxy herbicides such as MCPP have been associated with mixing/loading and disposal sites. Caution should be exercised when handling MCPP pesticides at such sites to prevent contamination of groundwater supplies. Use of closed systems for mixing and transferring this pesticide will reduce the probability of spills. Placement of the mixing/loading equipment on an impervious pad to contain spills will help prevent groundwater contamination.

**REENTRY:** Do not reenter or permit workers to reenter until treated sprays have dried.

## STATEMENT OF PRACTICAL TREATMENT

**IF IN EYES:** Immediately flush eyes with plenty of fresh water and get medical attention immediately. **IF SWALLOWED:** Drink one or two glasses of water, induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention immediately. **IF ON SKIN:** Wash skin with plenty of soap and water. Get medical attention if irritation persists. Launder clothing and decontaminate footwear before reuse. **IF INHALED:** Remove from contaminated atmosphere.

## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.**

**HANDLING PRECAUTIONS:** When using this product, wear long-sleeved shirt, long pants, socks, shoes and chemical resistant gloves. After using this product, rinse gloves before removing, remove clothing and launder separately before reuse, and promptly and thoroughly wash hands and exposed skin with soap and water. Remove saturated clothing as soon as possible and shower.

Do not allow people (other than applicator) or pets on treatment area during application  
Do not enter treatment area until spray has dried.

**OTHER USE PRECAUTIONS:** Do not allow spray to drift onto vegetables, flowers, ornamental plants, shrubs, trees and other desirable plants since injury may result. Do not pour spray solutions near these plants. Whether using a hose-end sprayer or pressure-sprayer, do not use sprays that are fine because they can drift and cause damage to nontarget plants. Coarse droplet sprays are less likely to drift. Use only lawn-type sprayers. Do not spray on carpetgrass, dothondra, not on lawns or turf where desirable clovers are present. Do not spray roots of trees and ornamentals. Do not exceed specified dosages for any area; be particularly careful within dripline of tree and other ornamental species. This product may be injurious to St. Augustine and Centipede grasses. Since injury can be expected on these lawns, "spot-spray" weeds only with a pressure sprayer.

**WHEN TO USE:** Spray at any time during the growing season, when weeds are actively growing. Treat Chickweed, Henbit, Wild Onion and Garlic in the Fall or in the Spring, as needed. On new lawns, wait until the turf has reached a height of 2 inches before making an overall spray treatment. "Spot-spray" weed treatment, however may be made at any time with a small pressure sprayer, spraying only the weeds at ground level. Wait 3 weeks before putting new grass seed or stolons down in the bare spots. Poor weed control may result if spray is applied during drought or just before rain. For best results mow before treating. Do not water lawn within 24 hours after treatment. Repeat, if necessary, for hard-to-kill weeds. The maximum number of broadcast applications per treatment site is 2 per year.

**SPOT SPRAY:** To spray small areas or individual weeds, do not use hose-end sprayer. Mix 1 oz. (2 Tbsp.) in 1/2 gallon water in pressure sprayer and spray as required being certain to "wet" each weed. Be sure to use ROCKLAND SPREADER STICKER according to the directions on that container so that each weed is thoroughly wet.

#### HOW MUCH TO USE--ENTIRE LAWN

**HOSE-END SPRAYER:** Use a hose-end sprayer designed for lawns. Put recommended amount of chemical (column 1) in bottle and add water to indicated level (Column 2), and spray on area indicated. For example - to spray 2,500 sq. ft., measure 10 oz. (20 Tbsp.) in jar and add water to the 10 gallons level and mix. Turn on hose and spray as evenly as possible over 2,500 sq. ft.

Column 1		Column 2	Column 3
Amount Three-Way Lawn Weed Killer to Use		Fill Bottle To (Gallons)	Area to Treat ( Sq. Feet)
(Tbsp.)	(Fl. Oz)		
10	5	5	1250
20	10	10	2500
30	15	15	3750
40	20	20	5000

**PRESSURE SPRAYERS:** Measure indicated amount of chemical into tank and dilute with water according to the following chart. Use a spray pattern which gives small spray droplets without any fine mist and cover the area indicated

Amount Three-Way Lawn Weed Killer to Use		Amount of Water in Sprayer (Gallons)	Area to be Sprayed (Sq. Ft.)
(Tbsp.)	(Fl. Oz.)		
2	1	1	250
4	2	2	500
6	3	3	750

**NOTE:** Whether using a hose-end sprayer or pressure sprayer, avoid sprays which are too fine because they can drift and damage ornamental or garden plants.

May be used on Blue Grass, Bermuda Grass or Zoysia lawns, vacant lots, playgrounds and similar areas where hard-to-kill weeds are present. This product is especially effective in the control of hard-to-kill weeds. A partial list of the weeds controlled follows:

Bedstraw, Black Medic, Buckhorn, Chicory, Chickweed, Clover, Dandelion, Dock, Ground Ivy, Heal-All, Henbit, Knotweed, Lambsquarter, Lespedeza, Mallow, Morning Glory, Oxalis, Peppergrass, Pigweed, Plantains, Poison Ivy, Poison Oak, Purslane, Ragweed, Sheep Sorrel, Shepherd's Purse, Speedwell, Spotted Spurge, Wild Carrot, Wild Lettuce, Wild Onion, Yarrow, and many others.

#### STORAGE AND DISPOSAL

Do not store near food or foodstuffs. Do not store near fertilizers, seed, insecticides or fungicides. Do not reuse empty container, wrap and put in trash collection.

**WARRANTY:** Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
