Rockland Wasp & Yellow Jacket Bomb kills Wasps and Hornets on contact, kills the entire nest. It kills with residual action as wasps & hornets return to nest. It can be used both indoors (attics and other places where nests are built) and outdoors on wasp & hornet nests. This product has electrically non-conducting dielectric breakdown voltage of 47,300 volts.

Read Entire Label.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. (Remove protective cap). Hold can upright and point spray opening toward nest with wind at your back. Residual action will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

To kill wasps, hornets and yellow jackets under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1-2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter, such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

Do not apply to pets or contaminate feed, foodstuffs, dishes or utensils. Avoid spraying vegetation directly.
