Deck Stain

*Revive
Deck Cleaner*

Deck Clear Seal

Seals, penetrates and preserves against rot.

- Dries clear - appears milky in the can.
- Penetrating oil-based formula is specially engineered with an effective wood preservative to provide protection against decay and rot, as well as mildew.
- Use on bare wood above ground - wood siding, decks, roof shingles, outdoor furniture, fences.
- Now with more powerful water repellents to keep water out and protect against cracking and splitting; exceeds Federal Specification TT-W-572b for water repellency.
- With special ingredients to make water bead up and roll off wood.
- May be applied immediately to new wood.
- New advanced formula has lower odor, is nonflammable and safer to use.
- Lets wood gray and weather naturally.
- Easy to use: apply by spray, brush or dip; now conveniently cleans up with soap and water.
- Recommended as a primer before paint to minimize blistering and peeling due to water absorption, and to provide decay resistance.

Formulated to meet the strictest Volatile Organic Compound (VOC) air pollution regulations in the United States. VOC's contained in this product are below 350 grams/liter or 2.9 pounds/gallon.

For preservation below ground and for wood in contact with water, use Cuprinol® No. 10 Green Wood Preservative.

Use Cuprinol REVIVE® Easy Deck Cleaner to remove dirt and stains caused by mildew and algae - leaving a fresh, natural look.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PREPARATION: THIS PRODUCT MUST BE APPLIED OUT-OF-DOORS TO WOOD INTENDED FOR EXTERIOR USE. NOT FOR INTERIOR USE. This product can be used for all suitable above ground applications. (Use Cuprinol® No. 10 Green Wood Preservative where any portion of the wood will be below ground.) Use on cedar, redwood, pressure-treated and most other woods. Do not apply over hardboard or particle board. Do not use on wood that will be in contact with food, feed or potable water, or where prolonged skin contact is expected. Wood may be damp but not wet and must be free of bark, mildew and any finish. May be applied immediately to new wood. Before and during use, thoroughly mix contents of can. DO NOT MIX WITH ANY OTHER PRODUCTS. DO NOT THIN. Product appears milky in the can but dries clear.

This preservative should not be applied to a mildewed surface. Test for mildew by applying a 50/50 solution of bleach and water. Mildew is present if the area lightens. Spray all mildew-infected surfaces with a solution of 1 qt. household bleach and 3 pts. warm water. Let stand for 30 minutes, then rinse with clean water. Redwood and cedar contain natural extractives. To minimize extractive discoloration, apply a solution of 1 part oxalic acid and 9 parts water. Let it sit for half an hour. Then rinse with clean water.

APPLICATION: Apply by synthetic brush, spray, or dip. For best results, apply when surface temperatures are between 50° and 90° which will not fall below 40° during 24 hours after application. Thoroughly cover cut ends with two coats. The more preservative absorbed by the wood, the longer and more effective the protection. If the first coat is quickly absorbed, apply a second coat at any time after the initial application has dried to the touch. DO NOT apply more than two coats. Treat to saturation, but be sure to pick up puddles with a brush. On initial treatment of new wood siding, two coats are recommended. When dipping, allow to soak for 3 minutes.

Use only one thin coat if used as a primer before painting. Wait at least 24 to 36 hours after application before painting with a good quality oil-based paint or primer. During humid conditions a longer drying time may be necessary. Wait 6 to 12 months before applying latex paints or clear finishes.

We recommend that wood be re-treated within 3 years. Roofs should be re-treated within 2 years. Areas subject to direct water contact or severe exposure may require earlier reapplication.

COVERAGE: Ranges from 150-300 sq. ft. per gallon depending on wood porosity, surface texture, and dryness of wood. Cuprinol® Clear Wood Preservative dries to the touch in 5 hours but thorough drying requires 24 hours.

CLEANUP: Clean brushes and tools immediately after use with soap and water. If cleanup is delayed, use mineral spirits or paint thinner.

USE ON BARE WOOD ABOVE GROUND

Wood siding, wood roof shingles, outdoor furniture, fence

STORAGE & DISPOSAL

STORAGE: Close container tightly and store upright to prevent leakage. Do not store near excessive heat, sparks or flames. Avoid storage near feed or food products. KEEP FROM FREEZING. Soak up spills or leaks with sand, dirt or synthetic absorbent.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Do not re-use original container. Triple rinse (or equivalent) then offer for recycling or puncture and dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

CAUTION: Keep out of reach of children. Harmful if swallowed. Avoid breathing spray mist or contact with eyes, skin or clothing. Use out-of-doors only. Wear goggles, rubber gloves and protective clothing when applying or handling freshly treated lumber. Wash thoroughly with soap and water after handling and before smoking or eating.

FIRST AID: If swallowed: Immediately drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention. If in eyes: Flush eyes with plenty of water. Get medical attention. If on skin: Wash skin thoroughly with soap and water. Get medical attention if irritation persists. If inhaled: Remove victim to fresh air. Resuscitate if necessary. Get medical attention.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by disposal of equipment wash waters. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Cuprinol Group will replace this product if purchased. Claims must be sent to: Cuprinol Group, 101 Prospect Avenue, Cleveland, Ohio 44115.

This warranty does not apply if the IMPLIED WARRANTIES IS LIMITED TO THE REPLACEMENT OF THE PRODUCT OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES, so the above limitations apply to the extent permitted by law. Specific legal rights, and you may
