SATISFACTION GUARANTEED

If, for any reason you are not completely satisfied with the results after applying this product, you are entitled to product replacement or your money back simply by presenting evidence of purchase to your local Earl May Garden Center.

FOR BEAUTIFUL LAWNS APPLY EARL MAY CRABGRASS PREVENTER plus LAWN FOOD ACCORDING TO THE FOLLOWING RECOMMENDATIONS:

Earl May Crabgrass Preventer plus Lawn Food has been specially formulated to prevent crabgrass, goosegrass, foxtail, and certain other annual grasses. The balance of non-burning fast-acting plant food elements supply the quick pick-up needed to fill in the bare spots and help prevent re-establishment of weeds by encouraging growth and formation of thick weed resistant turf.

APPLY IN LATE WINTER OR EARLY SPRING

Kills the crabgrass seedlings just as they are sprouting from the seed, but not after growth has begun, so get it on early!

It is essential to apply very evenly with no skips or misses. Set your spreader according to the chart below, then cover the area twice, the second time at right angles to the first as chart below shows.

Do not rake the lawn or disturb soil surface after application.

Water in lightly if no rain falls within a week after application.

On lawns newly seeded in the spring wait until after third mowing before applying Earl May Crabgrass Preventer plus Lawn Food.

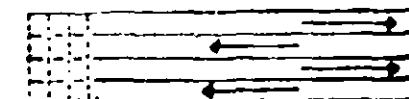

SPREADER SETTING

Cover area twice-second time at right angle to first for thorough coverage.

SPREADER	SETTING NUMBER
	2,500 Sq. Ft.
Cyclone	3 1/2
Scots	3 1/2
Wards	5
Lawn Beauty	7 1/2
Scotts	5

Spreading rate varies with walking speed, spreader calibration, and amount of overlap. To insure exact coverage, check spreader over a known area. Do not overlap feedings.

COVER AREA TWICE - SECOND TIME AT RIGHT
